Materially Different

Definition of materially different

When we review your programme we'll look at your reasons for developing it, including why our existing NCFE regulated qualifications don't meet your needs and we will also check if your programme is materially different to one of NCFE's regulated qualifications. The purpose of the materially different check is for us to be sure that your programme is not similar to one of our regulated qualifications. This helps to ensure that learners would not consider this as an NCFE owned and regulated qualification.

And so we would expect that you would check that it is not similar to another regulated qualification. If you need any advice on this, please do not hesitate to get in touch.

Please explain how your programme is materially different
