

T Level Technical Qualification in Science (Level 3) Delivered by NCFE (603/6989/9)

Online Sample Assessments

Our Online Sample Assessments provide students with an opportunity to practice taking a Science T Level Core Assessment on our online assessment platform. It allows students to embrace the online assessment experience, while attempting papers that give a true representation of our live assessments.

For core exams, students can familiarise themselves with the online tool applications before sitting their main exam.

We offer our sample assessments in 2 modes:

- **In-browser (online)** – can be accessed from the Qualification Support Materials page via your web browser without the need to schedule in Secure Assess:
 - [Core Paper A Link Here](#)
 - [Core Paper B Link Here](#)
- **Paper-based** – can be downloaded from the Qualification Support Materials page.

All sample Assessments will be Provider marked using the provided mark schemes. This allows you to identify student's strengths and weaknesses to ensure individualised skills plans can be made using the outcomes of the sample assessments.

We recommend our paper-based sample assessments as the best method for understanding a student's performance as this will allow you to go through the sample assessment with students on completion.

In-browser sample assessments

For in-browser assessments, we recommend using these sample materials to gain student familiarity with the NCFE online platform. If you wish to mark student responses, we recommend capturing this by taking screenshots of answers to each question throughout. To access these sample assessments simply click on the links above and it will take you through to the relevant In-browser (online) Question Paper. Once you have selected your exam and the 'test page' has opened, simply click "start exam" and the assessment will begin.
