

Interview tips

NCFE How to prepare:

- **Review the job description**, considering the skills and experience you can bring to the role. Try to think of some examples where you've previously demonstrated the requirements so you can mention during the interview.
- **Visit the company website** and social media pages so that you can describe what you know about the company and why you want to work there.
- **Think of some questions** to ask the interviewer – maybe you want to learn more about the culture or structure of the team you'll be working in, or what the values and behaviours of the organisation are. Take this opportunity to highlight your interest in the company!

NCFE How to prepare:

- **Make sure you're prompt** and that you arrive early, whether for an interview in person or via video. Check your journey time or make sure that any links for remote interviews work in advance.
- Don't be afraid to **ask for clarification of the interview format** and what you can do to prepare ahead of time.
- **Plan your answers ahead of time** – consider providing the interviewer with STAR method responses
- **Think about your appearance** you don't need to wear a suit and tie, but sportswear is likely to be a no go!
