## **Summary of changes**

This section summarises the changes to this qualification specification since the last version (Version 1.1 March 2020).

Version	Publication Date	Summary of amendments	
v1.0	November 2019	First publication	
v1.1	March 2020	p.35 Information regarding the wellbeing and safeguarding of learners added to <u>Learning Resources</u> .	
v1.2	June 2022	Further information added to the <u>achieving this qualification</u> section to confirm that unless otherwise stated in this specification, all learners taking this qualification must be assessed in English and all assessment evidence presented for external quality assurance must be in English.  Information added to the <u>entry guidance</u> section to advise that registration is at the discretion of the centre, in accordance with equality legislation and should be made on the Portal.  Information added to the <u>support handbook</u> section about how to access support handbooks.  Amendment made to refer to General Data Protection Regulation (GDPR) as UK General Data Protection Regulation (UK GDPR).	

## Section 1

**About this qualification** 

### Introduction

This qualification specification contains details of all the units and assessments required to complete this qualification.

To ensure that you are using the most up-to-date version of this qualification specification, please check the version number and date in the page footer against that of the qualification specification on the NCFE website.

If you advertise this qualification using a different or shortened name, you must ensure that learners are aware that their final certificate will state the full regulated qualification title.

Reproduction by **approved** centres is permissible for internal use under the following conditions:

- you may copy and paste any material from this document; however, we do not accept any liability for any incomplete or inaccurate copying and subsequent use of this information
- the use of PDF versions of our support materials on the NCFE website will ensure that correct and up-to-date information is provided to learners
- any photographs in this publication are either our exclusive property or used under licence from a third-party. They are protected under copyright law and cannot be reproduced, copied or manipulated in any form. This includes the use of any image or part of an image in individual or group projects and assessment materials. All images have a signed model release
- the resources and materials used in the delivery of this qualification must be age-appropriate and due consideration should be given to the wellbeing and safeguarding of learners, in line with your institute's safeguarding policy when developing or selecting delivery materials

#### Support handbook

This qualification specification must be used alongside the mandatory support handbook which can be found on the NCFE website. This contains additional supporting information to help with planning, delivery and assessment.

This qualification specification contains all the qualification-specific information you will need that is not covered in the support handbook.

Qualification summary		
Qualification title	Level 2 Certificate in Understanding Technology Enabled Care	
Qualification number (QN)	603/5155/X	
Aim reference	6035155X	
Total Qualification Time (TQT)	132	
Guided Learning Hours (GLH)	110	
Minimum age	16	
Qualification purpose	This qualification is designed for learners who want to increase their knowledge and understanding of Technology Enabled Care (TEC). It will support the learner to develop their knowledge of how a range of technology can be used to help improve an individual's quality of life and support them to live independently.	
Aims and objectives	<ul> <li>This qualification aims to:</li> <li>focus on the study of TEC in the health and social care industry</li> <li>offer breadth and depth of study, incorporating a key core of knowledge.</li> <li>The objectives of this qualification are to support the learner to:</li> <li>gain an understanding of TEC, which can be used to help support an individual's quality of life</li> <li>understand person-centred care approaches to TEC that can be used help support independence, health and wellbeing</li> <li>understand different roles and responsibilities in relation to TEC</li> <li>gain an understanding of legislation, safeguarding and regulatory requirements relating to TEC</li> </ul>	
Work/industry placement experience	This is a knowledge only qualification. Work/industry placement experience is not required.	
Real work environment (RWE) requirement/ recommendation	This is a knowledge only qualification. Experience in the real work environment is not required.	
Rules of combination	Learners are required to successfully achieve 4 mandatory units.	
Grading	Achieved/Not Yet Achieved	

Assessment method	Internally assessed and externally quality assured portfolio of evidence.	
Recognition	The voice of technology enabled care  'As demand increases on our Health and Care System, digital technology plays a huge role in the transformation of care. TSA are delighted to work with NCFE, CACHE to launch the first Level 2 Qualification in Understanding Technology Enabled Care and how it can improve the quality outcomes for People. This powerful resource will empower our care workforce to think differently about how CARE is delivered and putting people at the heart and centre of everything we do.'	
Progression	<ul> <li>Learners who achieve this qualification could progress to:</li> <li>Level 3 Award in Health and Social Care</li> <li>Level 3 Certificate in Health and Social Care</li> <li>Level 3 Diploma in Health and Social Care</li> </ul>	
Regulation information	This is a regulated qualification. The regulated number for this qualification is 603/5155/X.	
Funding	This qualification may be eligible for funding. For further guidance on funding, please contact your local funding provider.	

## **Entry guidance**

This qualification is designed for learners who want to increase their knowledge and understanding of technology enabled care, and how a range of technology can be used to improve an individual's quality of life and help to support them to live independently.

Registration is at the discretion of the centre, in accordance with equality legislation and should be made on the Portal.

Entry is at the discretion of the centre. However, learners should be aged 16 or above to undertake this qualification.

There is no specific prior knowledge a learner must have for this qualification. However, learners may find it helpful if they have already achieved a level 1 healthcare or social care related qualification.

Centres are responsible for ensuring that this qualification is appropriate for the age and ability of learners. They need to make sure that learners can fulfil the requirements of the learning outcomes and comply with the relevant literacy, numeracy and health and safety aspects of this qualification.

Learners registered on this qualification should not undertake another qualification at the same level with the same or a similar title, as duplication of learning may affect funding eligibility.

## Achieving this qualification

To be awarded this qualification, learners are required to successfully achieve 4 mandatory units.

Please refer to the list of units below or the unit summaries in section 2 for further information.

Unless otherwise stated in this specification, all learners taking this qualification must be assessed in English and all assessment evidence presented for external quality assurance must be in English.

To achieve this qualification, learners must successfully demonstrate their achievement of all learning outcomes of the units as detailed in this qualification specification. A partial certificate may be requested for learners who do not achieve their full qualification but have achieved at least one whole unit.

## **Units**

To make cross-referencing assessment and quality assurance easier, we have used a sequential numbering system in this document for each unit.

The regulated unit number is indicated in brackets for each unit (for example, M/100/7116) within section 2.

Knowledge only units are indicated by a star. If a unit is not marked with a star, it is a skills unit or contains a mix of knowledge and skills.

## **Mandatory units**

	Unit number	Regulated unit number	Unit title	Level	GLH	Notes
公	Unit 01	A/617/8308	Introduction to Technology Enabled Care	2	20	
☆	Unit 02	A/617/8311	Understand a person-centred approach to Technology Enabled Care	2	30	
公	Unit 03	F/617/8312	Understand roles and responsibilities in relation to Technology Enabled Care	2	30	
$\stackrel{\wedge}{\sim}$	Unit 04	J/617/8313	Introduction to legislation, safeguarding and regulatory requirements relating to Technology Enabled Care	2	30	

The units above may be available as stand-alone unit programmes. Please visit our website for further information.

## How the qualification is assessed

Assessment is the process of measuring a learner's skill, knowledge and understanding against the standards set in a qualification.

This qualification is internally assessed and externally quality assured.

The assessment consists of one component:

 an internally assessed portfolio of evidence which is assessed by centre staff and externally quality assured by NCFE

#### Internal assessment

Each learner must create a portfolio of evidence generated from appropriate assessment tasks, which demonstrates achievement of all the learning outcomes associated with each unit. On completion of each unit, learners must declare that the work produced is their own and the assessor must countersign this. Examples of suitable evidence for the portfolio for each unit are provided in section 2.

Internally assessed work should be completed by the learner in accordance with the qualification specification.

The tutor must be satisfied that the work produced is the learner's own.

If a centre chooses to create their own internal assessment tasks, they must:

- be accessible and lead to objective assessment judgements
- permit and encourage authentic activities where the learner's own work can be clearly judged
- refer to course file documents on the NCFE website

## Supervision of learners and your role as an assessor

Guidance on how to administer the internal assessment and the support you provide to learners can be found on the NCFE website.

#### Feedback to learners

Guidance on providing feedback during teaching and learning and each stage of the assessment can be found on the NCFE website.

# Section 2

Unit content and assessment guidance

## Unit content and assessment guidance

This section provides details of the structure and content of this qualification.

The types of evidence listed are for guidance purposes only. Within learners' portfolios, other types of evidence are acceptable if all learning outcomes are covered and if the evidence generated can be internally and externally quality assured. For approval of methods of internal assessment other than portfolio building, please contact our quality assurance team.

The explanation of terms explains how the terms used in the unit content are applied to this qualification. This document can be found in section 3.

For further information or guidance about this qualification, please contact our customer support team.

## Unit 01 Introduction to Technology Enabled Care (A/617/8308)

Unit summary	In this unit, the learner will gain an understanding of technology enabled care, which can provide a range of technology-based solutions that can be used to improve an individuals' quality of life and support them to live as independently as possible by focusing on their individual needs.	
Guided learning hours	20	
Level	2	
Mandatory/optional	Mandatory	
Learner name:		
Centre no:		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record (for example,page number & method)	Assessor Initial and date
Understand technology     enabled care (TEC)	1.1 Explain what is meant by the term technology enabled care		
	1.2 Identify how TEC has evolved over time		
	<ul> <li>1.3 Explain how TEC can benefit the:</li> <li>individual</li> <li>carer</li> <li>organisation</li> </ul>		
	1.4 Give examples of how TEC can benefit people with a range of additional support needs and circumstances		
	1.5 Identify a range of settings that might benefit from the use of TEC		
	<ul> <li>1.6 Identify how to access a range of TEC available:</li> <li>regionally</li> <li>nationally</li> <li>other</li> </ul>		
	1.7 Give examples of how consumer devices and products can be used to provide TEC		
	2.1 Describe the benefits of TEC within the <b>health and social care</b> system		

2. Understand the benefits of TEC within the health and social care system	2.2 Explain how TEC can be used to promote independence, wellbeing and self-care  2.3 Explain how the use of data collection and analysis from TEC can aid in future care planning	
	2.4 Give examples of potential future developments in TEC	

## Keywords

**Health and social care (H&SC):** to include a range of organisations and people involved in the care of the individual.

**Organisation:** to include both public and private bodies providing the TEC solution, (for example, NHS, social services, private healthcare/TEC providers).

Carer: may include a family member, partner, friend and/or neighbour.

**Other:** can include any other consumer devices/products available on the market, (for example, mobile applications (Apps), 'virtual assistants' such as Alexa, Siri, Google Home).

## Assessment guidance

## **Delivery and assessment**

The learner will gain knowledge and understanding of TEC and its utilisation in the support of people living independently with conditions within the context of current health and social care policy.

Learners should be able to describe the different types of TEC available and how it may benefit individuals with a range of needs and circumstances. Learners should also understand how technology might impact on individuals' wider networks, such as carers and/or family members. They should also have an understanding of self-care and how this fits into the wider health and social care context.

Learners should also be able to appreciate the different technologies used in certain H&SC settings and how this may vary in settings such as residential care, nursing care, hospital care and those living independently at home.

- 1.1 Learners must explain what is meant by the term TEC, (for example, a piece of technology that helps keep someone independent). Learners could include an explanation of specific TEC methods such as Telecare, Telehealth, for example.
- 1.2 Learners must identify how TEC has evolved over time and will continue to develop, (for example, telecare has developed from a social alarm used by an individual to call for help to a series of movement detectors, door opening detectors, bed sensors).
- 1.3 Learner must explain the benefits of TEC to each of the following:
  - individuals provide better standard of care, promote independence, safety, for example
  - family members peace of mind, communication benefits, promote independence, safety and self-care
  - organisations to monitor, prevent incidents before they occur, free up staff time, for example
- 1.4 Learners must give examples of a range of ages, health conditions and personal circumstances which can be supported by TEC.
- 1.5 Learners need to identify that TEC can benefit a range of settings, for example:
  - sheltered/supported housing
  - private home owners
  - general needs housing
  - network houses
  - other
- 1.6 Learners must identify the different avenues of availability for TEC:
  - regionally what is available in their chosen region and regional bodies such as healthcare providers and H&SC settings
  - nationally national bodies such as the NHS and H&SC settings

• other – consumer products, (for example, self-care Apps, 'virtual assistants' such as Alexa, Google Home

What is available from regional or national providers – to also provide a full package of care built around the TEC rather than just the technology itself.

- 1.7 Learners could provide examples of how consumer devices can be used to provide TEC.
- 2.1 Learners must describe the benefits of TEC within H&SC, including (but not limited to): prevention, monitoring, independence, cost effective, help with support planning (monitoring analysis) use of plug and play, warden call, Apps, 'virtual assistants' (for example, Alexa, Google Home), Globing Positioning System (GPS), monitoring equipment, Virtual Reality (VR).
- 2.2 Learners can explain how TEC can be used to enable individuals to continue to live independently, (for example, fall detectors to give individuals the confidence that if they fall, someone will come in response, caesura detectors so that advanced warning can be given to individuals and health professionals before the event).
- 2.3 Learners will explain how data can be used to understand patterns in individual behaviour.
- 2.4 Learners will give examples of current and future developments taking place in TEC. With new models of care emerging and evolving, there is a need for more effective information sharing between care settings, organisations and geographies, as well as between professionals and individuals. Learners should also consider interoperability, which is key to future vision of care.

#### Types of evidence

Evidence could include:

- research
- learner report

For e-portfolio a signature is not required, providing the learner has a personalised and secure login.

## Unit 02 Understand a person-centred approach to Technology Enabled Care (A/617/8311)

Unit summary	In this unit, the learner will understand person-centred care approaches to TEC that can be used to support independence, health and wellbeing.		
Guided learning hours	30		
Level	2		
Mandatory/optional	Mandatory		

Learner name:	
Centre no:	

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record (for example, page number & method)	Assessor Initial and date
Understand person- centred care in relation to TEC	1.1 Explain what is meant by person- centred care		
TEC	1.2 Identify how TEC can support early intervention to meet current or delay future care needs		
	1.3 Explain how TEC can support the principles of effective person-centred care, health and wellbeing		
	1.4 Identify the potential barriers to using TEC in relation to person-centred care		
	1.5 Describe the limitations of using TEC in relation to person-centred care		
2. Understand the importance of effective communication in relation to TEC	2.1 Describe the key factors that may impact on effective communication in relation to TEC		
	<ul> <li>2.2 Explain how TEC can be used as a communication tool for the:</li> <li>individual</li> <li>carer</li> <li>service provider</li> <li>community</li> </ul>		

3.Understand the positive impact TEC can have in reducing isolation	3.1 Describe the issues of social isolation	
	3.2 Give examples of the positive impact	
	TEC can have on reducing isolation	
4. Understand person- centred care in TEC assessment and care planning	4.1 Explain the importance of assessing an individual's circumstances before implementing a care plan	
	4.2 Identify when TEC can be used as an assessment tool	
	4.3 Identify how TEC can be used as a solution to meet an individual's assessment need	

## Keywords

Carer: may include a family member, friend, partner and/or neighbour/key holder.

## **Assessment guidance**

## **Delivery and assessment**

1.1 Learners need to explain person-centred care and how it is the cornerstone of effective and appropriate TEC and H&SC. Learners must explain the principles of person-centred care and how technology relates to this.

Person-centred values include:

- individuality
- rights, choice and privacy
- independence
- dignity
- respect
- partnership
- safety
- 1.2 Learners should identify how implementing TEC as early as possible can positively affect the individual's life, (for example, promotes self-care, confidence, independence, feeling safe and secure for example, fall monitoring can avoid an individual being left injured on the floor).
- 1.3 Learners should explain how TEC can positively affect the following:
- individuality
- rights, choice and privacy
- independence
- dignity
- respect
- partnership
- safety

They should also consider the positive effects on both the health and wellbeing of the individual. This may include aspects that are:

- spiritual
- emotional
- cultural
- religious
- social
- political
- sexual
- physical
- mental
- 1.4 Learners should identify negative perceptions surrounding TEC, (for example, fear of 'big brother', fear of the unknown, ethics). Learners must consider the need for the individual to be happy with the TEC solution. Learners should also consider issues surrounding how to access TEC and funding considerations.

1.5 Learners also need to describe the principles of holistic assessment, taking into account the different elements of individuals' lives, (for example, work, home and social lives and the way that technology can support this).

Learners should describe how TEC forms only part of the holistic care plan. Acknowledge that without human interaction in the process, TEC cannot be fully effective, (for example, pill dispensers are reminders but can't give the medication; fall detectors can say a person has fallen but can't stop them from falling).

Technology is not the starting point for an effective person-centred assessment, it is an enabler and means to an end for many people. Learners must have an understanding of how technology can support the individual in a person-centred way, and not the other way around.

- 2.1 Learners should describe the need for comprehensive knowledge of TEC being important so that the operation, activation benefits and limitations of TEC can be communicated properly, (for example, taking into account a person's mental capacity, dexterity).
- 2.2 Learners must explain the benefits and communication opportunities which can be introduced through TEC for the following:
- individual
- carer
- service provider
- community
- 3.1 Learners should describe the current issues surrounding isolation, including the reported number of individuals affected.
- 3.2 Learners should investigate case studies and provide examples of positive effects of TEC on isolated individuals.
- 4.1 Learners must explain the importance of understanding and listening to the individual's needs and wishes when developing a care plan. They must also understand an individual's personal circumstances and how this allows for the use of the correct TEC best suited to their circumstances, (for example, a dementia patient who is especially lucid on certain days can potentially be different when assessed on another). Without proper assessment/review of medical history, TEC may be implemented incorrectly.
- 4.2 4.3 Learners should identify observations and data that can be collected about an individual's lifestyle and current health issues, and how it can be used to meet the assessment need and provide a solution.

## Types of evidence

Evidence could include:

- research
- learner report
- case study

For e-portfolio a signature is not required, providing the learner has a personalised and secure login.

## Unit 03 Understand roles and responsibilities in relation to Technology Enabled Care (F/617/8312)

Unit summary	In this unit, the learner will gain an understanding of the different roles and responsibilities in relation to the appropriate use of Technology Enabled Care.
Guided learning hours	30
Level	2

	relating to TEC		
2. Understand different	2.1 Identify different types of devices		
types of TEC devices available and their	available and their functions		
functions	2.2 Describe the range of triggers that can activate a device		
	2.3 Describe the process that occurs when a specific device is activated		

	<ul> <li>2.4 Explain what follow up action and contingency could be taken if a device fails to work by the following:</li> <li>individual</li> <li>carer</li> <li>service provider</li> <li>2.5 Identify the importance of follow up support and monitoring to ensure the TEC solution is fit for purpose</li> </ul>	
2. I lo do roto o d the		
3. Understand the infrastructure for TEC	3.1 Identify the difference between analogue and digital relating to TEC	
	3.2 Explain the benefits of using data collected from TEC	
	3.3 Describe the financial implications and financial support available for various TEC solutions	

## Keywords

Carer: may include a family member, friend, partner and/or neighbour/key holder.

## Assessment guidance

## **Delivery and assessment**

Learners should also demonstrate an awareness of the limitations, as well as the benefits, of technology and how this is relevant in different health and social care settings.

Learners will be able to explain if the technology used is connected to a landline, if it is digital or if it makes use of mobile SIM.

- 1.1. Learners must describe the important role that each stage/person plays in the overall delivery of TEC. Learners must consider the holistic assessment to identify if the individual is experiencing difficulties or any issues. The learner could also identify negative effects of stages not being performed correctly, (for example, due diligence on the TEC manufacturer or provider specific training in the use of TEC, contingency if it doesn't work, and review).
- 1.2 Learners must identify who could be responsible for each stage.
- 1.3 Learners must explain the limitations of TEC and issues that may occur if TEC is used incorrectly, (for example, TEC installed but no responder, individual unsure how to use TEC, potential for installing the wrong TEC if an individual's circumstances/full medical history are not properly assessed).
- 1.4 Learners must identify at least 3 individuals who might escalate concerns, (for example, general practioner (GP), family member, neighbour, homecare worker).
- 2.1 Learners must identify 3 different devices available and their functions. Learners will be able to explain how the piece of equipment is activated and how the service user would be able to use this to help support independence.
- 2.2 Learners must describe the triggers of the 3 devices they have identified, (for example, movement, pressure, heat, increased heart rate.
- 2.3 Learners must describe the follow up processes that occur for their 3 devices after activation, such as: Who is alerted? Where does the data go? What next steps are taken (standard response protocol)?
- 2.4 Learners must explain the detrimental impact of a device not working as intended, for example, if a fall detector fails to detect a fall, for the:
- individual the person who is benefitting from the TEC
- carer family friends could be a keyholder for the individual with the TEC
- service provider could be as individual as the carer or as large as the organisation providing and running the TEC
- 2.5 Learners must identify the importance of follow up support and that individuals' needs and technology can change over time, therefore TEC may need to be changed and new TEC may need to be introduced along with existing TEC, for example.
- 3.1 Learners should identify the differences and address the fact that analogue is planned to be phased out of the sector in 2025 the shift in TEC provision will be entirely to digital.

- 3.2 Learners can explain how data can be used to develop broader practice and internal processes for the organisations responsible for TEC. Feedback data from devices can also be used to improve device design and efficiency.
- 3.3 Learners must not only describe the financial costs of implementing TEC but also address the fact that TEC is not all about saving money on care. Sometimes, TEC solutions can be more expensive to implement (it's about what is best for the individual). Learners should identify financial support available from local authorities and charities and how this can be funded.

Learners should also show an understanding of the ongoing financial implications of TEC, (for example, it isn't just a one off cost of purchase, but also includes monitoring and maintenance costs).

## Types of evidence

Evidence could include:

- research
- report

For e-portfolio a signature is not required, providing the learner has a personalised and secure login.

## Unit 04 Introduction to legislation, safeguarding and regulatory requirements relating to Technology Enabled Care (J/617/8313)

Unit summary	In this unit, the learner will understand legislation, regulatory requirements and the principles of safeguarding relating to technology enabled care.
Guided learning hours	30
Level	2
Mandatory/optional	Mandatory
Learner name:	
Centre no:	

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record (for example, page number & method)	Assessor Initial and date
Understand legal, ethical and regulatory requirements relating to	1.1 Identify legislation that could impact on the use of TEC		
TEC	1.2 Explain the ethical and regulatory frameworks that may impact on using TEC in health and social care		
	1.3 Identify the principles of data protection and information governance in relation to TEC		
2. Understand the	2.1 Identify the principles of safeguarding		
principles of safeguarding relating to TEC	2.2 Explain the principles of safeguarding for individuals using TEC		
	2.3 Explain the importance of consent and capacity and how they may impact on the individual		
	2.4 Identify issues around an individual's right to privacy when using TEC		
	2.5 Identify different sources of information and support available to safeguard the individual while using TEC		

Understand risks     associated with TEC	3.1 Identify risks associated with the use of TEC	
	3.2 Explain the risks associated with the purchase of TEC	
	3.3 Describe how to overcome the risks identified	

## Assessment guidance

## **Delivery and assessment**

1.1 – 1.2 There are a number of legal, ethical and regulatory frameworks which may impact on the use of assistive living technologies. Learners will need to identify these and how they may impact on different scenarios and use cases for technology. Key technologies such as global positioning system (GPS) and monitoring and surveillance technologies should be considered as key examples of ethical issues around technology, as well as the obligations around sharing of data with other parties (for example, family members or the health or social care service).

Learners must cover legislation such as:

- Mental Health Act 1983
- Care Act 2014
- Mental Capacity Act 2005
- Safeguarding

Legislation is subject to change and current requirements must be used as relevant to their own home nation.

1.3 Learners will need to explain the difference between consent and governance:

Governance famework brings together relevant policies, procedures and controls to ensure that information is managed in compliance with legislative, regulatory and contractual requirements, whilst also enabling and supporting the delivery of objectives and exploiting opportunities for business benefits.

Consent is one of the 6 lawful bases under which personal data may be processed in compliance with the UK General Data Protection Regulation (UK GDPR). The guidance below should help determine whether consent is an appropriate legal basis for a proposed personal data processing activity and if help is needed to document consent adequately. Consent is a key issue relating to the use of technology and this should be taken into account when considering how to communicate the impact and implications of any technology solutions.

A lack of capacity could be due to, for example:

- a stroke or brain injury
- a mental health problem
- dementia
- a learning disability
- substance misuse
- confusion, drowsiness or unconsciousness
- 2.1 Safeguarding concerns: examples could include falls, administration of medication, nutrition, pressure area care, social exclusion, behaviour that challenges, institutionalised care, 'rough' treatment, rushed care, abuse between individuals, pain management and restraint.
- 2.2 Learners could investigate national policies and different pieces of legislation that safeguard adults. They could explore the local systems that reflect legislation and national policy.

- 2.3 Learners must explain how consent and the capacity to consent can be established with an individual. Learners should make reference to the Mental Capacity Act within their explanation.
- 2.4 Learners must identify the right to privacy contained within the Human Rights Act 1998 and how this affects provision of TEC. Learners can explain issues surrounding the individual feeling TEC infringes on their right to privacy, (for example, may feel it is watching them (big brother)).
- 2.5 Learners must identify different sources of information relating to safeguarding, such as appropriate:
- medical professionals/service providers
- online resources
- factsheets
- 3.1 3.3 Learners will recognise and be able to understand the importance of risk management in relation to assistive living technologies in a range of settings. They will be able to identify risks to the service user from a range of sources, such as financial, environmental, technical, data protection, emotional and social factors, as well as developing mitigation and management techniques.

Learners should be confident in identifying risks and determining both their impact and their likelihood in relation to assistive living technologies. They should also look to identify the risks to different audiences, including the user themselves, formal and informal carers and family members. Learners should also be able to communicate these risks to others and present a balanced view of the likelihood and severity of the risks.

- 3.1 Learners can identify issues surrounding topics such as responsibility for medication, (for example, policies relating to pill dispensers: Who fills the dispenser? Who is responsible for the medication in general?) Learners should also consider false perceptions, (for example, it's not a safety net; it can't stop a fall; it can't make the individual take the medication; it can't stop a fire).
- 3.2 Learners must explain issues relating to the emergence of scam sales/fraud of TEC, implications of buying the wrong equipment, and financial outlay involved in TEC, for example.
- 3.3 Learners must describe how to overcome the risks identified and the importance of the following:
- authorised installation
- full knowledge of the TEC
- recognised support networks surrounding TEC

### Types of evidence

Evidence could include:

- research
- learner report

For e-portfolio a signature is not required, providing the learner has a personalised and secure login.

### Recommended assessment methods

A recommended range of assessment methods has been identified, which may be used for the units in this qualification. This gives the opportunity for different learning styles and individual needs of learners to be taken into account.

If you are proposing to use an assessment method that is not included within the recommended list, you should contact your external quality advisor with full details of your proposed method. It will need formal approval from us before it can be used.

Each learner must generate evidence from appropriate assessment tasks which demonstrate achievement of all the learning outcomes associated with each unit. (Grades are not awarded.)

Ref	Assessment Method	Assessing Competence/ Skills	Assessing Knowledge/ Understanding
A	Direct observation of learner by assessor  • by an assessor who meets the relevant Sector Skills Council's or other assessment strategy/principles and includes inference of knowledge from this direct observation of practice.	Yes	Yes
В	Professional discussion	Yes	Yes
С	<ul> <li>Expert witness testimony*</li> <li>when directed by the Sector Skills Council or other assessment strategy/principles.</li> </ul>	Yes	Yes
D	Learner's own work products	Yes	Yes
Е	Learner log or reflective diary	Yes	Yes
F	Activity plan or planned activity	Yes	Yes
G	Observation of children, young people or adults by the learner	Yes	Yes
Н	Portfolio of evidence  may include simulation**	Yes	Yes
I	Recognition of prior learning	Yes	Yes
J	Reflection on own practice in real work environment	Yes	Yes

K	Written and pictorial information	No	Yes
L	Scenario or case study	No	Yes
М	Task set by CACHE (for knowledge learning outcomes)	No	Yes
N	Oral questions and answers	Yes	Yes

<sup>\*</sup> Expert witness testimony should be used in line with the relevant assessment strategy/principles. This method must be used with professional discretion, and only selected when observation would not be appropriate. Those providing an expert witness testimony must be lead practitioners with experience of making judgements around competence. The circumstances that may allow for an expert witness testimony include:

- when assessment may cause distress to an individual, such as supporting a child with a specific need
- a rarely occurring situation, such as dealing with an accident or illness
- confidential situations such as safeguarding strategy meetings where it would be inappropriate for an Assessor to observe the learner's performance

## **Assessment strategy**

## Knowledge learning outcomes

- assessors will need to be both occupationally knowledgeable and qualified to make assessment decisions
- internal quality assurers will need to be both occupationally knowledgeable and qualified to make quality assurance decisions

<sup>\*\*</sup> **Simulation**. A learner's portfolio of evidence may only include simulation of skills where simulation is permitted by the relevant assessment strategy/principles.

# Section 3

**Explanation of terms** 

## **Explanation of terms**

(not all verbs are used in this qualification)

Apply	Link existing knowledge to new or different situations.
Assess	Consider information in order to make decisions.
Classify	Organise according to specific criteria.
Compare	Examine the subjects in detail looking at similarities and differences
Define	State the meaning of a word or phrase.
Demonstrate	Show an understanding of the subject or how to apply skills in a practical situation.
Describe	Write about the subject giving detailed information.
Differentiate	Give the differences between two or more things.
Discuss	Write an account giving more than one view or opinion.
Distinguish	Show or recognise the difference between items/ideas/information.
Estimate	Give an approximate decision or opinion using previous knowledge
Explain	Provide details about the subject with reasons showing how or why. Some responses could include examples.
Give (positive and negative points)	Provide information showing the advantages and disadvantages of the subject.
Identify	List or name the main points (some description may also be necessary to gain higher marks when using compensatory marking).
Illustrate	Give clear information using written examples, pictures or diagrams.
List	Make a list of key words, sentences or comments that focus on the subject.
Plan	Think about and organise information in a logical way. This could be presented as written information, a diagram, an illustration or other suitable format.
Perform	Do something (take an action/follow an instruction) which the question or task asks or requires.
Provide	Give relevant information about a subject.
Reflect	Learners should look back on their actions, experiences or learning and think about how this could inform their future practice.

Select	Choose for a specific purpose.
Show	Supply sufficient evidence to demonstrate knowledge and understanding.
State	Give the main points clearly in sentences.
Use	Take or apply an item, resource or piece of information as asked in the question or task.

## Section 4

**Additional information** 

#### **Additional information**

## **Resource requirements**

There are no mandatory resource requirements for this qualification, but centres must ensure learners have access to suitable resources to enable them to cover all the appropriate learning outcomes.

## Support for centres

## **Key Facts**

This document outlines the key information of this qualification for the centre, learner and employer.

#### **Useful websites**

Centres may find the following websites helpful for information, materials and resources to assist with the delivery of this qualification:

TSA: <u>www.tsa-voice.org.uk/</u>
 NHS: www.england.nhs.uk/tecs/

## Learning resources

We offer a wide range of learning resources and materials to support the delivery of our qualifications. Please check the qualifications page on the NCFE website for more information and to see what is available for this qualification.

The resources and materials used in the delivery of this qualification must be age-appropriate and due consideration should be given to the wellbeing and safeguarding of learners in line with your institute's safeguarding policy when developing or selecting delivery materials.

## Third-party products

Products to support the delivery of this qualification are offered by the following third-party suppliers:

Learning Curve Group

For more information about these resources and how to access them, please visit the NCFE website.
