

# Your post-16 options explored

There are a variety of routes you can take that will lead you to higher level studies and help you progress in your career.

## T LEVELS

- These are the Government's new flagship qualifications which are the technical / vocational equivalent of 3 A Levels or an apprenticeship.
- You can gain vital work experience alongside your studies, with a built-in 45-day industry placement.
- Developed alongside employers and recognised by universities, you have the option to progress to skilled work, higher level study or an apprenticeship.
- Choose from a range of subjects including Education and Childcare, Health and Science, and Digital.

## LEVEL 3 VOCATIONAL QUALIFICATIONS

- These work-based qualifications are equivalent to 2 A Levels, an advanced technical certificate or a diploma.
- They're delivered through colleges and training providers and assess a mixture of competence, knowledge and skills.
- Many of these qualifications carry UCAS points so can lead to university, as well as to the workplace.

## STRAIGHT INTO EMPLOYMENT

- Learn and progress on the job and gain industry experience.
- Start earning straight away.

## A LEVELS

- Widely recognised subject based qualifications that lead to university, further study, training or work.
- Usually academic in nature, you can study 3 or more A Levels over 2 years in a school, college or sixth form environment.
- They're generally assessed by a series of exams.
- Studying a selection of subjects can help you explore your career options.

## APPRENTICESHIPS

- Gain on-the-job experience (alongside a nationally recognised qualification) and make workplace connections sooner.
- Earn as you learn - with the average salary for an apprentice being £20, 563.
- No tuition fees, which means no student debt.

**All these valid routes can lead to career progression, further study, opportunities and happiness - the future is yours!**
