About this Qualification Specification

This Qualification Specification contains details of all the units and assessments you will be required to complete to gain this qualification. It also contains extra information for Tutors and/or Assessors.

How the qualification works

This qualification is made up of units each representing a small step of learning. This allows the qualification to be completed at your own pace.

All of the units achieved can be 'banked'. This means that if you want to take another qualification which includes the same units you do not have to take them again.

Each unit has:

- a **level** – shows how difficult it is
- a **credit value** – one credit represents about 10 hours' work
- a **unit aim** – explains what is covered in the unit
- **learning outcomes** – cover what you need to do (skills) or what you need to understand (knowledge)
- **assessment criteria** – what you need to show (evidence)

Each learning outcome is linked to a number of assessment criteria. Evidence must be provided for all the assessment criteria to gain the unit.

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
1. Know substances which are commonly misused.	1.1. List categories of substances which are commonly misused.		
	1.2. Identify substances which are commonly misused.		

Total Qualification Time/Guided Learning: Definitions

Total Qualification Time (TQT) is comprised of the following two elements:

- the number of hours which we have allocated to a qualification for Guided Learning
- an estimated number of hours a Learner will reasonably be likely to spend in preparation, study, or any other form of participation in education or training, but not under the immediate supervision of a Tutor or Assessor.

Centres can decide how to allocate the TQT across the units of a qualification.

Guided Learning (GL)

- GL and TQT apply to the qualification as a whole.
- We use GL to refer to the estimated guided learning hours at unit level.

Barred units

This qualification contains barred units. These will be identified in Section 3: Units.

Recognition of Prior Learning (RPL)

Centres may recognise prior learning at their discretion if they are satisfied that the evidence provided meets the requirements of a qualification. Where RPL is to be used extensively (for a whole unit or more), advice must be given by your External Quality Advisor.

Understanding learning outcomes

There are two main types of learning outcome:

- **Skills** that can be performed
- **Knowledge** that can be learnt.

Sometimes they can cover a combination of the two.

Competence-/Skills-based learning outcomes:

- Begin with 'Be able to'. The assessment criteria usually show that the evidence could be observable within a real work environment. Other methods may be applied (please see chart in Assessment Guidance section). All evidence must be based on the learner's experience in a real work environment.

Knowledge-based learning outcomes:

- Begin with 'Know', 'Understand' or 'Know how to'.

For your convenience, Knowledge-only units are indicated by a star in both the Unit Achievement Log and at the top of the units.

If a unit is not marked with a star, it is a skills unit or contains a mix of knowledge and skills.

Plagiarism

Plagiarism means claiming work that has been copied from someone or somewhere else to be your own. All the work you submit must be your own and not copied from anyone else unless you clearly reference the source of your information. Your Tutor will explain how to provide a reference list that shows where you found your information. If your Centre discovers evidence that your work is copied from elsewhere, it will not be accepted and you may be subject to your Centre's disciplinary procedure or ours. If this happens you will have to submit an additional piece of work for assessment. We will be notified of any cases of plagiarism.

Buying and selling assignments

Offering to buy or sell assignments is not allowed. This includes using sites such as eBay. If this happens we reserve the right not to accept future entries from you.

Equal opportunities

We fully support the principle of equal opportunities and oppose all unlawful or unfair discrimination on the grounds of ability, age, colour, culture, disability, domestic circumstances, employment status, gender, marital status, nationality, political orientation, racial origin, religious beliefs, sexual orientation and social background. We aim to ensure that equality of opportunity is promoted and that unlawful or unfair discrimination, whether direct or indirect, is eliminated both in its own employment practices and in access to its qualifications. A copy of our Diversity and Equality policy is available on the NCFE website.

Diversity, access and inclusion

Our qualifications and associated assessments are designed to be accessible, inclusive and non-discriminatory. We regularly evaluate and monitor the 6 diversity strands (gender, age, race, disability, religion, sexual orientation) throughout the development process as well as delivery, external moderation and external assessment processes of live qualifications. This ensures that positive attitudes and good relations are promoted, discriminatory language is not used and our assessment procedures are fully inclusive.

Learners who require reasonable adjustments or special consideration should discuss their requirements with their Tutor, who should refer to our Reasonable Adjustments and Special Considerations policy for guidance. For more information on the Reasonable Adjustments and Special Considerations policy please see the NCFE website.

Qualification support

This qualification meets the **Skills for Health** qualification design criteria and is supported by them.

Section 3: Units

Healthcare support staff can work in a variety of different settings within the NHS and private care facilities. The role of the support staff is to provide assistance to healthcare professionals in diagnosing, treating and caring for patients.

The Level 3 Diploma in Healthcare Support provides learners with the knowledge, understanding and skills required to work in a range of healthcare support settings.

The qualification is formed of mandatory and optional units. The mandatory units cover core competencies while the optional units allow learners to choose from a variety of specialist areas to tailor the qualification to their needs, interests and to reflect the context of their work.

The content of the qualification also aligns with the knowledge and skills required for the **Senior Healthcare Support Worker** Apprenticeship Standard.

Mandatory and optional units

This section is split into mandatory and optional units. The optional units have been split into smaller groups that reflect the **optional specialisms** within the **Senior Healthcare Support Worker Apprenticeship Standard**

Optional unit groups:

- Option 1: Adult Nursing Support
- Option 2: Maternity Support
- Option 3: Theatre Support
- Option 4: Mental Health Support
- Option 5: Children and Young People Support
- Option 6: Allied Health Profession – Therapy Support

The units within the groups are **indicative** of units that could be taken to meet a particular option within the standard; however, the actual combination of units selected remains the responsibility of the Centre. There is a mixture of skills/competence and knowledge-only units to select from.

Centres:

- must support learners/apprentices to select units based on their chosen option within the standard reflecting the context in which they work
- can select optional units **across** any of the groups within the qualification
- must ensure that the qualification's rules of combination is met
- can use the Unit achievement log on the next page to help with the selection of units.

In addition, Skills for Health has also provided guidance to support with unit selection to meet the Senior Healthcare Support Worker apprenticeship standard. This guidance document can be found on the qualification's webpage.

For each unit the following information has been provided:	
Unit title	Provides a clear, concise explanation of the content of the unit.
Organisation unit reference number	The unique number assigned by the owner of the unit.
Unit reference	The unique reference number given to each unit at qualification approval by Ofqual.
Unit level	Denotes the level of the unit within the framework.
Unit credit value	The value that has been given to the unit based on the expected learning time for an average learner.
Unit guided learning (hours)	Estimated learning time under direct supervision.
Unit aim	Provides a brief outline of the unit content.
Learning outcome	A statement of what a learner will know, understand or be able to do as a result of a process of learning.
Assessment criteria	A description of the requirements a learner must achieve to demonstrate that a learning outcome has been met.
Additional information*	This box identifies the assessment strategy relevant to the unit. When required, this will include specific guidance relating to the assessment of the unit and information to support the learner to achieve.
Unit assessment guidance*	Any additional guidance provided to support the assessment of the unit.
Unit guided learning hours	The average number of hours of supervised or directed study time or assessment required to achieve a qualification or unit of a qualification.

* *Additional information* and *Unit assessment guidance* may not be provided for all units.

NB: Words highlighted in bold in the learning outcomes, assessment criteria and assessment tasks are linked to the additional guidance section where more information can be found.

**Explanation of terms used at Level 3:
(not all verbs are used in this qualification)**

Apply	Explain how existing knowledge can be linked to new or different situations in practice.
Analyse	Break the subject down into separate parts and examine each part. Show how the main ideas are related and why they are important. Reference to current research or theory may support the analysis.
Clarify	Explain the information in a clear, concise way.
Classify	Organise according to specific criteria.

DHS 15: Assessment guidance

Guidance for centres

Study skills for senior healthcare support workers is a mandatory unit within the Level 3 Diploma in Healthcare Support.

The study skills unit should be assessed via an extended piece of writing or a project which can also be used as evidence towards the assessment of other units within the qualification. The production of this piece of work will not automatically assess the study skills unit in its entirety as there are knowledge criteria that also need to be evidenced, for example through using evidence from planning or monitoring meetings with Tutors.

Centres will need to liaise with employers on suitability of the piece of work/project.

Centres may set a range of projects/titles suitable for cohorts or it may be appropriate to agree individual titles with learners.

Timeframes for the production of the piece of work/project are to be agreed between the centre and the learner; however, it is expected that the piece of work/project will be produced towards the end of the qualification in order for the learner to be able to apply the knowledge and skills acquired during the programme of study.

It is important that any piece of work/project provides scope for investigation and exploration. Examples include:

- evolution of a job role/clinical area
- service improvement
- impact of policy on your practice
- new technology or innovation
- application of theories.

Centres and employer involvement should be as follows:

- initial planning stage including ethical considerations
- regular reviews with the learner which would include further guidance/areas to be improved
- reviews should be recorded.

Special considerations will be taken into account when completing this piece of work/project.

For your information, example wording on guidance for learners and an assessment grid have been provided.

Assessment guidance grid

	Requirement	Assessor Comments
1.	Purpose and aims of extended piece of work/project are clearly stated and relevant to the work produced	
2.	Learner has conducted primary and/or secondary research which is clearly referenced and relevant to the work produced	
3.	Learner has created a project plan which considers: <ul style="list-style-type: none"> • topic • aims/terms of reference • audience • justification/methodology • timescales • sources • ethical considerations <p><i>The project plan should be included in the appendix for the work produced</i></p>	
4.	Language and style is appropriate for audience is considered throughout work produced <p><i>Does not have to be 100% accurate but it is clear that the learner is aware of how to write for a particular audience</i></p>	
5.	Summary/Abstract has been included and is appropriate	
6.	Methodology is clear, reflects approach and is and relevant to the purpose of the work produced	
7.	Findings are displayed in a clear and concise way <p><i>Findings can be navigated easily</i></p>	
8.	Analysis has been conducted and evidenced by synthesis of information and discussion	

9.	Conclusion reflects the analysis	
10.	<p>Recommendations have been identified (if appropriate)</p> <p><i>If recommendations are not appropriate then please ignore this</i></p>	
11.	<p>References are correctly formatted in the agreed style</p> <p><i>There are different referencing styles that can be used:</i></p> <ul style="list-style-type: none"> • <i>footnote style - reference information is kept in footnotes and not placed in the body of the text. 12.	<p>Work produced has been written in standard English, including correct use of grammar, punctuation and spelling</p> <p><i>Does not have to be 100% correct throughout the work, but you can see from what has been produced that the learner is able to create extended pieces of work/projects using standard English</i></p>	
13.	<p>Agreed milestones achieved in line with project plan</p> <p><i>Taking into consideration any amendments to the project plan and any issues that may have occurred</i></p>	

Guidance for learners

1. You are required to undertake an extended piece of work/project based on research relating to your area of work
2. This is an opportunity to investigate, explore or solve a problem related to an area of interest to you or that could be of value to your employer. This will involve undertaking primary and/or secondary research and compiling your findings in a report of 1500 words (plus or minus 10%)
3. You will need to agree the idea, scope and methodology for your project in discussion with your Tutor and employer

These are things you must include in your report:

- title
- purpose and aims
- summary/abstract
- methodology
- findings
- discussion & Analysis
- conclusion
- any recommendations (if appropriate)
- references
- appendices – project plan to be included in any appendix.

	4.11 Explain the correct process for labelling and other protocols in relation to blood samples.		
	4.12 Explain the actions to be taken if complications and problems occur during the collection of capillary blood samples, including contra-indications.		
5. Be able to test and record the results of blood samples.	5.1 Test the sample using the approved method in line with organisational procedure.		
	5.2 Describe normal or expected results for particular tests.		
	5.3 Recognise and interpret normal, expected and abnormal results.		
	5.4 Ensure that results are passed on to an appropriate staff member for interpretation as required.		
	5.5 Record results fully and accurately and forward according to local requirements.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
6. Be able to pass on the results of blood samples.	6.1 Communicate the results of the tests and any further action required to the individual.		
	6.2 Respond to questions and concerns from individuals, providing accurate information.		
	6.3 Refer issues outside own responsibility to an appropriate staff member.

AN 6: Carry out arterial puncture and collect arterial blood

Unit reference	J/615/7350	Unit level	3
Credit value	4	GL	30
Unit aim	<p>This unit covers obtaining arterial blood samples by arterial puncture. This would normally be an investigative procedure, and may be performed in healthcare settings. It would not be performed in the individual's home.</p> <p>The procedure will be performed with adults and children and with individuals in critical care areas such as intensive care units. It may include the use of a range of equipment, blood collection systems and techniques relating to arterial sites.</p>

	1.2 Describe the responsibilities and boundaries related to own role.		
	1.3 Outline how to prepare equipment and materials required for aspiration and the removal of nasogastric tubes.		
	1.4 Explain the importance of following health and safety procedures.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	1.5 Outline how to deal with concerns that individuals may have in relation to clinical procedures such as aspiration and the removal of nasogastric tubes.		
	1.6 Outline the action to take in the event of an individual reacting adversely to the nasogastric procedure.		
2. Know the anatomy and physiology of the upper gastrointestinal system and its relevance to nasogastric procedures.	2.1 Describe the anatomy and physiology of the upper gastrointestinal system in relation to the aspiration and removal of nasogastric tubes.		
	2.2 Describe the normal and abnormal appearance and content of stomach/intestinal fluid according to the individual's presenting medical condition.		
	2.3 Outline the action to take to reduce or deal with potential sources of contamination when undertaking aspiration and removal of nasogastric tubes.		
	2.4 Describe the potential consequences of contamination of nasogastric tubes and equipment used for aspiration.		
3. Be able to prepare to carry out nasogastric procedures.	3.1 Apply standard precautions for infection control.		
	3.2 Apply health and safety measures relevant to the procedure and environment.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	3.3 Prepare resources, equipment and materials needed for the aspiration and removal of nasogastric tubes prior to starting the activity.		
	3.4 Confirm the individual's identity and gain valid consent prior to carrying out nasogastric procedures.		
	3.5 Explain the procedure to the individual, ensuring they have all the information they require to meet their needs.		
	3.6 Position the individual and self so that the procedure can be carried out safely and comfortably.		
4. Be able to support individuals undergoing nasogastric procedures.	4.1 Carry out the nasogastric procedures as directed and in accordance with the individual's care plan and local policy and protocol.		
	4.2 Observe the individual throughout the activity, taking action to deal with any condition or behaviour which may signify adverse reactions.		
	4.3 Check the nasogastric tube and any drainage bags are securely attached in a way that prevents discomfort and maintains the individual's dignity.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	4.4 Assess nasogastric aspirate for any change in appearance, informing the care team of any areas of concern in line with local policy and protocol.		
	4.5 Measure and record the volume of aspirate.		
	4.6 Pack up used equipment and materials and cover receptacles containing nasogastric aspirate prior to leaving the immediate care area.		
	4.7 Dispose of used equipment and materials and nasogastric aspirate in line with local policy and protocol.		
	4.8 Update records and make them available to the care team in line with local policy and protocol.

	2.3 Explain the importance of working within own area of competence and seeking advice when faced with situations outside own area of competence.		
3. Understand the requirements and procedures for assisting in the administration of medication.	3.1 Explain the purpose and significance of the information which should be provided on the label of a medication.		
	3.2 Describe the different routes for the administration of medication.		
	3.3 Describe the type, purpose and function of materials and equipment needed for the administration of medication within own area of responsibility.		
	3.4 Describe the various aids which can be used to help individuals take their medication.		
	3.5 Explain the importance of applying standard precautions for infection control and the potential consequences of poor practice.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	3.6 Explain why medication should only be administered against the individual's medication administration record and in a way which is consistent with the prescriber's advice.		
4. Understand the requirements and procedures for ensuring an individual's safety.	4.1 Explain the importance of identifying the individual for whom the medications are prescribed.		
	4.2 Explain the importance of confirming the medication against the prescription/protocol with the person leading the administration before administering it.		
5. Be able to prepare for the administration of medication.	5.1 Obtain or confirm valid consent for the administration of medication.		
	5.2 Apply standard precautions for infection control.		
	5.3 Select, check and prepare the medication according to the medication administration record or medication information leaflet.		
	5.4 Explain the importance of referring confusing or incomplete instructions back to the person leading the administration or the pharmacist.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	5.5 Check and confirm the identity of the individual who is to receive the medication with the person leading the activity and with the individual themselves before the medication is administered.		
6. Be able to assist in the administration of medication.	6.1 Contribute to administering the medication to the individual using the correct technique and at the prescribed time according to the care plan.		
	6.2 Assist the individual to be as self-managing as possible.		
	6.3 Explain the importance of seeking help and advice from a relevant member of staff if the individual will not or cannot take the medication.		
	6.4 Monitor the individual's condition throughout the administration process.		
	6.5 Explain the types of adverse effects that may occur and the action to take if they do.		
	6.6 Check and confirm that the individual has taken the medication and does not pass medication to others.		
7. Be able to contribute to the management of medications and administration records.	7.1 Explain the importance of keeping accurate and up-to-date records of the administration of medication.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	7.2 Contribute to completing the necessary records relating to the administration of medications legibly, accurately and completely.		
	7.3 Maintain the security of medication and related records throughout the administration process and return them to the correct place for storage.		
	7.4 Maintain the confidentiality of information relating to the individual at all times.		
	7.5 Check the stock level of medications and take action to obtain new stocks when required.

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
1. Understand the need for tissue viability risk assessment.	1.1 Describe the anatomy and physiology of healthy skin.		
	1.2 Describe the changes that occur when damage caused by pressure develops.		
	1.3 Explain when an initial tissue viability risk assessment may be required.		
	1.4 Describe what to look for when assessing the condition of the skin.		
	1.5 Describe pre-disposing factors which may exacerbate risk of impaired tissue viability and skin breakdown.		
	1.6 Describe external factors, including shearing forces, which may exacerbate risk of impaired tissue viability and skin breakdown.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
2. Be able to undertake tissue viability risk assessment.	2.1 Identify individuals who may be at risk of impaired tissue viability and skin breakdown.		
	2.2 Apply standard precautions for infection prevention and control.		
	2.3 Inspect the general condition of an individual's skin.		
	2.4 Identify the sites where pressure damage might occur using appropriate assessment tools.		
	2.5 Complete a tissue viability risk assessment within an appropriate time scale, as determined by organisational policy.		
	2.6 Use safe handling techniques when assisting the individual to move during the assessment.		
	2.7 Encourage the active participation of the individual and others where applicable.		
3. Be able to record and report on tissue viability risk assessment.	3.1 Complete tissue viability risk assessment documentation.		
	3.2 Share findings with appropriate staff and the individual.		
	3.3 Notify appropriate staff of any immediate concerns in line with local policies and guidance.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
4. Understand when the risk assessment should be reviewed.	4.1 Explain why the tissue viability risk assessment should be regularly reviewed and repeated.		
	4.2 Explain when the tissue viability assessment tool, or the current review cycle may no longer be appropriate.

	3.2 Apply health and safety measures relevant to the procedure and environment.		
	3.3 Obtain, prepare and position medical devices and equipment in line with local policies and protocols.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	3.4 Use, care for and store medical devices and equipment in line with manufacturers' instructions and local policies and protocols.		
	3.5 Monitor and count surgical instruments, swabs and sharps with the appropriate person in line with national and local policies and protocols.		
	3.6 Maintain tracking and traceability requirements for sterile items.		
	3.7 Dispose of clinical and hazardous waste safely, according to local policies and protocols.		

Additional information about the unit:	
Relationship to National Occupational Standards (NOS)	PCS24.
Additional unit assessment requirements	This unit must be assessed in line with Skills for Health's Assessment Principles. Learning outcome 3 must be assessed in a real work environment.
Unit guidance	The circulating role is someone in a clinical role assisting the practitioner during perioperative procedures. Standard precautions are the precautions considered sufficient to reduce the risk of harm or injury by transmission of pathogens.

	<p>The sterile field is a specified area that is considered free of viable microorganisms. This is often an area immediately around an individual that has been prepared for a surgical procedure. The sterile field includes the scrubbed team members, and all furniture and fixtures in the area.</p> <p>An appropriate person is the designated member of the team responsible for counting the surgical instruments.</p>

THEA 2: Receive and handle clinical specimens within the sterile field

Unit reference	D/615/7192	Unit level	3
Credit value	4	GL	30
Unit aim	This unit is aimed at those who work in a scrubbed role to receive and handle clinical specimens. Learners will have the opportunity to develop the ability to receive and handle clinical specimens within the sterile field.		

Learner name:		Centre no:	
PIN:		ULN:	

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
1. Understand how to receive and handle clinical specimens within the sterile field in line with health and safety guidance.	1.1 Identify the different types of specimens received and handled within the perioperative environment.		
	1.2 State the requirements for handling and transporting both frozen and non-frozen clinical specimens to ensure their condition is maintained.		
	1.3 Identify different types and uses of container and transport media in the perioperative environment.		
	1.4 Describe the potential consequences of poor practice related to handling, labelling and transporting clinical specimens.		
	1.5 Explain how to deal with hazards associated with receiving and handling clinical specimens.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	1.6 Explain the pathogenic causes of wound infections.		
	1.7 Explain the consequences of the contamination of clinical specimens.		
2. Be able to receive and handle clinical specimens within the sterile field.	2.1 Apply standard precautions for infection control.		
	2.2 Apply health and safety measures relevant to handling clinical specimens.		
	2.3 Obtain valid consent to collect clinical specimens.		
	2.4 Receive specimens in line with local policies and procedures.		
	2.5 Maintain the sterile field when passing specimens to the appropriate person.		
	2.6 Ensure specimens are labelled and documentation has been completed in line with local policies and procedures.		
	2.7 Process and dispatch clinical specimens in line with local policies and procedures.

THEA 3: Prepare anaesthetic environment and provide support for pre-and post-operative anaesthesia and recovery

Unit reference	H/615/7193	Unit level	3
Credit value	5	GL	38
Unit aim	This unit equips learners within the anaesthetic/recovery environment with knowledge about health and safety measures and the parameters for clinical readings, as well as competence in the preparation of equipment and the care of individuals. This involves a degree of autonomy and responsibility.		

Learner name:		Centre no:	
PIN:		ULN:	

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
1. Understand health and safety measures specific to carrying out activities in the anaesthetic/recovery environment.	1.1 Explain the standard precautions required for preparing the anaesthetic/recovery environment and the potential consequences of poor practice.		
	1.2 Explain the importance of wearing personal protective equipment in the anaesthetic/recovery environment.		
	1.3 Explain the importance of using equipment in line with manufacturers' instructions and local policies and protocols.		
	1.4 Explain how to recognise clinical emergencies, and how to provide support to the registered practitioner in these emergencies.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
2. Understand the parameters for clinical readings taken in the anaesthetic/recovery environment.	2.1 Identify the normal parameters for temperature, pulse, blood pressure, respiration, oxygen levels and urinary output.		
	2.2 Explain how to measure an individual's temperature, blood pressure, respiration, oxygen levels and urinary output.		
	2.3 Explain how anaesthesia may affect an individual's temperature, pulse, blood pressure, respiration, oxygen levels and urinary output.		
	2.4 Explain the common adverse reactions an individual may experience related to anaesthetic and recovery care.		
	2.5 Explain the importance of reporting any issues beyond own competence in accordance with local policies and protocols.		
3. Be able to prepare and maintain anaesthetic/recovery equipment for the reception of individuals.	3.1 Apply health and safety measures relevant to anaesthetic/recovery equipment.		
	3.2 Apply standard precautions for infection control.		
	3.3 Ensure equipment and documentation is available for the registered practitioner.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	3.4 Document and report any equipment that is unfit for use according to local policies and protocols.		
	3.5 Clean reusable equipment in line with local policies and protocols.		
	3.6 Dispose of single-use equipment and waste according to local policies and protocols.		
	3.7 Maintain the stock of disposables/fluids/line.		
4. Be able to assist the registered practitioner in caring for individuals in the anaesthetic/recovery environment.	4.1 Confirm the individual's identity and gain valid consent.		
	4.2 Maintain the individual's privacy, dignity and comfort when the individual is transferred and received into the anaesthetic/recovery environment.		
	4.3 Work within own sphere of competence, recognising when to refer on issues.		
	4.4 Use verbal and non-verbal skills to support individuals, prior to and after anaesthesia/sedation, overcoming any possible communication difficulties.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	4.5 Support the registered practitioner in the assessment, management and reassurance of the individual in the anaesthetic/recovery environment.		
	4.6 Monitor the individual as delegated by the registered practitioner in accordance with the care plan.		
	4.7 Measure and record clinical observations, reporting any deviation from normal parameters to the registered practitioner.		
	4.8 Record information in line with local policies and protocols.		

Additional information about the unit:	
Relationship to National Occupational Standards (NOS)	PCS25.
Additional unit assessment requirements	This unit must be assessed in line with Skills for Health's Assessment Principles. Learning outcomes 3 and 4 must be assessed in a real work environment.

THEA 4: Contribute to the safe use of medical devices in the perioperative environment

Unit reference	H/615/7209	Unit level	2
Credit value	4	GL	29
Unit aim	This unit is aimed at those whose responsibility it is to ensure medical devices in the perioperative environment are safe for use. Learners will have the opportunity to consolidate safe working practices which are underpinned by an understanding of sterile practices and fields within the perioperative environment.		

Learner name:		Centre no:	
PIN:		ULN:	

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
1. Understand the importance of following health and safety requirements when using medical devices in the perioperative environment.	1.1 Explain how sterile fields are maintained in the perioperative environment.		
	1.2 Describe the sterilisation processes used for medical devices .		
	1.3 Explain the role of traceability systems and recording mechanisms in health and safety.		
	1.4 Explain the importance of compliance with specific organisational health and safety policies and procedures for medical devices and the implications of non-compliance.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	1.5 Describe how to sort and dispose of medical devices and waste materials in line with local policies and protocols.		
	1.6 Identify different types of waste and spillage and how to dispose of them.		
2. Be able to check and handle medical devices in the perioperative environment, according to health and safety procedures.	2.1 Apply standard precautions for infection control.		
	2.2 Apply health and safety measures relevant to handling medical devices.		
	2.3 Follow procedures for ensuring medical devices are fit for purpose.		
	2.4 Follow procedures for the use and storage of medical devices.		
	2.5 Document and report any shortage of supplies according to local policy and protocol.		
3. Be able to check the integrity of instrument trays.	3.1 Confirm instrument trays contain the specified items before and after use and record in line with local policies and procedures.		
	3.2 Follow tracking and traceability procedures for the safe use of instrument trays.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	3.3 Implement the correct procedures for locating and replacing missing items from instrument trays and record and report to the appropriate person in line with local policies and procedures.		
	3.4 Identify, record and report any faulty equipment, instruments or soft pack items to the appropriate team member.		
4. Be able to dispose of used items and equipment safely.	4.1 Dispose of single-use equipment in line with local policies and protocols.		
	4.2 Ensure items for decontamination and sterilisation are processed in accordance with local policies and protocols.		
	4.3 Ensure empty pack containers, trays and used medical devices are placed in the appropriate location for collection.

THEA 5: Provide support to the surgical team when preparing individuals for operative and invasive procedures

Unit reference	Y/615/7210	Unit level	3
Credit value	4	GL	32
Unit aim	This unit is aimed at those who support the surgical team when preparing individuals for operative procedures. Learners will have the opportunity to develop knowledge, understanding and skills related to preparing individuals and selecting, handling and disposing of surgical instruments and supplementary items.		

Learner name:		Centre no:	
PIN:		ULN:	

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
1. Understand how to prepare individuals for operative and invasive procedures in line with national guidelines, policies, protocols and good practice.	1.1 Explain how to apply standard precautions to the preparation of individuals for operative and invasive procedures.		
	1.2 Explain the importance of applying standard precautions to the health and safety of individuals.		
	1.3 Identify sources of contamination when preparing individuals for operative and invasive procedures.		
	1.4 Explain the dangers of re-using single-use equipment.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
2. Understand the factors to be considered in the choice of surgical instruments and supplementary items during operative procedures.	2.1 Identify the types, purpose and functions of surgical instruments and supplementary items used in the surgical environment.		
	2.2 Describe potential hazards of using surgical instruments and ways to minimise the risk of harm.		
	2.3 Explain the factors affecting the choice of surgical instruments and supplementary items.		
	2.4 Identify the factors which inform the choice of sites for attachment of surgical instruments.		
	2.5 Explain how different types of skin preparation agents and surgical drapes are used in the surgical environment to provide barriers to cross infection.		
3. Be able to support others to prepare individuals for operative and invasive procedures.	3.1 Confirm the individual's identity and gain valid consent.		
	3.2 Apply standard precautions for infection control.		
	3.3 Implement health and safety measures relevant to the procedure and environment.		
	3.4 Identify the individual's operative site, clarifying any queries with the appropriate person .		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	3.5 Support others to prepare the individual for an operative or invasive procedure, maximising their dignity, comfort and safety.		
4. Be able to select, handle and dispose of surgical instruments and supplementary items for operative and invasive procedures.	4.1 Select and handle surgical instruments and supplementary items safely and in line with the manufacturers' instructions.		
	4.2 Select an appropriate site in the sterile field for attaching surgical instruments and supplementary items.		
	4.3 Account for and record all items and swabs used in the preparation of the operative site in line with local policies and protocols.		
	4.4 Dispose of waste generated during surgical preparation in line with local policies and protocols.

THEA 6: Assist in receiving, handling and dispatching clinical specimens

Unit reference	R/615/7268	Unit level	2
Credit value	2	GL	17
Unit aim	This unit is aimed at those who assist others to receive, handle and dispatch clinical specimens. Learners will have the opportunity to develop knowledge, understanding and skills related to using appropriate containers and transport methods while ensuring precautions related to infection control are upheld.		

Learner name:		Centre no:	
PIN:		ULN:	

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
1. Understand how health and safety measures are implemented when receiving, handling and dispatching clinical specimens.	1.1 Explain how the standard precautions for infection control apply when receiving, handling and dispatching specimens.		
	1.2 Describe how to avoid compromising the sterile field .		
	1.3 Outline the actions to take when there is a breakdown in the sterile field.		
2. Understand the reasons for different containers and transport media for different clinical specimens.	2.1 Identify different types and uses of containers and transport media used in the perioperative environment.		
	2.2 Explain the differences between the types of specimens and how these are received, handled and dispatched.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	2.3 Explain the potential consequences of failing to follow procedure when handling, labelling and dispatching clinical specimens.		
3. Be able to assist others to receive, handle, label and dispatch clinical specimens.	3.1 Apply standard precautions for infection control.		
	3.2 Implement health and safety measures relevant to handling clinical specimens.		
	3.3 Use the correct container and transport medium for the type of specimen as directed by the appropriate person .		
	3.4 Receive, handle, label, dispatch and record information on specimens in line with local policies and protocols as directed by the appropriate person.		
	3.5 Notify the appropriate person of any queries relating to clinical specimens which are beyond own competence.		
	3.6 Update records in line with local policies and protocols.

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
1. Understand the importance of health and safety measures when transporting, transferring and positioning individuals and equipment in the perioperative care environment.	1.1 Explain the standard health and safety precautions used when moving, handling and transporting individuals and equipment and the potential consequences if these are not applied.		
	1.2 Explain the safe techniques and procedures used for moving and positioning individuals and equipment in the perioperative environment, according to local and organisational policies and procedures.		
	1.3 Explain the importance of using personal protective equipment.		
	1.4 Identify situations when additional protective equipment may be required.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
2. Understand the requirements for pressure area care in the perioperative environment.	2.1 Explain how to contribute to the maintenance of individuals' skin integrity in the perioperative environment.		
	2.2 Explain how to use risk assessment documents for pressure area care during transfers and positioning.		
	2.3 Explain the importance of using appropriate equipment to minimise the risk of tissue damage.		
	2.4 Explain the importance of recording and reporting using the appropriate documents in line with local policies and protocols.		
3. Be able to prepare to transport individuals within the perioperative care environment.	3.1 Identify the nature of the task required in discussion with the appropriate person /registered practitioner.		
	3.2 Apply standard precautions for infection control.		
	3.3 Implement health and safety measures relevant to transporting individuals within the perioperative care environment.		
	3.4 Check that the transport equipment is clean, safe and functioning in line with local policies and protocols.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date

	3.6 Identify the individual who needs to be moved.		
	3.7 Inform the individual of the nature and purpose of the transfer and the role of people involved.		
	3.8 Confirm that any required documents are available to accompany the individual.		
4. Be able to assist in the transfer and positioning of individuals within the perioperative environment.	4.1 Use safe moving and handling techniques which minimise risk to all involved, including pain, friction and discomfort for those being moved.		
	4.2 Transfer and position individuals according to instructions, confirming they are positioned safely, comfortably and in accordance with guidelines.		
	4.3 Maintain the privacy, dignity, safety, security and comfort of individuals while using equipment for transfer and positioning.		
	4.4 Identify the effects of pre-medication and anaesthesia on the ability of individuals to move independently.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	4.5 Use verbal and non-verbal skills to support individuals, closely observing and reporting any changes in condition to the appropriate team member.		
	4.6 Transfer the individual and their associated documentation over to the appropriate member of staff in the perioperative environment.		
	4.7 Return equipment to the correct location in good working order.

THEA 8: Measure and record individuals' body fluid balance in a perioperative environment

Unit reference	R/615/7285	Unit level	3
Credit value	4	GL	23
Unit aim	This unit is aimed at those who work within the perioperative environment to measure, record and review individuals' fluid balance. This unit provides an opportunity to develop understanding of the procedures which underpin measuring individuals' fluid balance, and the importance of doing so.		

Learner name:		Centre no:	
PIN:		ULN:	

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
1. Understand safe procedures relating to measuring and recording individuals' fluid balance in a perioperative environment.	1.1 Describe the purposes of measuring an individual's fluid balance and wound drainage.		
	1.2 Describe the factors that affect fluid input, output and wound drainage.		
	1.3 Explain the potential hazards associated with measuring an individual's body fluids and wound drainage.		
	1.4 Describe adverse circumstances related to measuring and recording an individual's fluid balance that would require immediate reporting.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	1.5 Describe organisational policies and procedures on correct disposal of single-use equipment and other hazardous waste.		
	1.6 Explain the organisational policies and procedures for reporting and recording faulty equipment.		
	1.7 Explain why it is important to work within own sphere of competence.		
2. Be able to measure, record and review individuals' body fluid balance in a perioperative environment.	2.1 Confirm the individual's identity and gain valid consent.		
	2.2 Apply standard precautions for infection control.		
	2.3 Implement health and safety measures relevant to recording an individual's body fluid balance when carrying out this task.		
	2.4 Measure the individual's fluid input, output and wound drainage using equipment in line with local policy and protocol.		
	2.5 Record the individual's body fluid balance in line with local policy and protocol.		
	2.6 Identify the difference between body fluid and other fluids.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	2.7 Review fluid balance measurements in line with local policy and protocol.		
	2.8 Explain why it is necessary to report any problems in measuring or recording the individual's fluid balance in line with local policy and protocol.		
	2.9 Report results in line with local policy and protocol.		
3. Be able to manage equipment after measuring individuals' body fluid balance.	3.1 Clean reusable equipment after use using the correct materials in line with local policy and protocols.		
	3.2 Return equipment to the storage or collection location.		

Additional information about the unit:	
Relationship to National Occupational Standards (NOS)	PCS6.

THEA 9: Assist in the delivery of perioperative care and support to individuals

Unit reference	M/615/7360	Unit level	3
Credit value	4	GL	31
Unit aim	This unit is aimed at those who support and monitor individuals in a perioperative environment, according to their care plan. The learner will develop their understanding of how the perioperative environment and procedures affect individuals' responses to clinical interventions.		

Learner name:		Centre no:	
PIN:		ULN:	

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
1. Understand the potential effects of the perioperative environment and procedures on individuals undergoing perioperative care.	1.1 Explain the effects of pre-medication and sedation on the individual and how these affect support and monitoring requirements.		
	1.2 Explain the importance of ensuring the environment is suitable for the conscious /unconscious individual.		
	1.3 Identify factors in the perioperative environment and procedures which could cause stress and distress to the individual.		
	1.4 Describe the signs of distress which may be exhibited by the individual in the perioperative environment and how these affect support requirements.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
2. Be able to support individuals in a perioperative environment according to their care plan.	2.1 Use verbal and non-verbal communication to support the individual's comfort, privacy, dignity, emotional and physical care needs according to their care plan.		
	2.2 Communicate information in a way that is sensitive to the personal beliefs and preferences of the individual.		
	2.3 Respond to the individual's questions, referring on those outside own sphere of competence in accordance with local policy and protocol.		
	2.4 Provide support and care to the individual to promote their comfort in the perioperative environment.		
3. Be able to monitor individuals in a perioperative environment according to the requirements of their care plans.	3.1 Explain the importance of closely monitoring the individual in the perioperative environment.		
	3.2 Identify any changes in and concerns about the individual's condition.		
	3.3 Seek advice about changes in and concerns about the individual's condition in line with local policy and protocol.		
	3.4 Record outcomes of monitoring activities in line with local policy and protocol.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date

THEA 10: Prepare and dress for scrubbed clinical roles

Unit reference	J/615/7249	Unit level	2
Credit value	4	GL	28
Unit aim	This unit is aimed at those who work under direction from the perioperative team. Learners will have the opportunity to develop underpinning knowledge of the requirements involved in preparing and dressing for the scrubbed clinical role and be able to apply these to practice.		

Learner name:		Centre no:	
PIN:		ULN:	

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
1. Understand how to follow safe procedures when preparing and dressing for scrubbed clinical roles.	1.1 Explain how national guidelines and local policies and protocols inform the selection and preparation of personal protective equipment.		
	1.2 Explain what is meant by an aseptic environment and the sterile field .		
	1.3 Explain the importance of reporting any potential contamination in line with local policies and procedures.		
2. Know how to work within own sphere of competence.	2.1 Outline the importance of understanding and working within the limits of own competence.		
	2.2 Identify the action to take on issues outside own sphere of competence.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
3. Understand how to dress for scrubbed clinical roles.	3.1 Explain how to follow infection control procedures in preparation for the scrubbed clinical role.		
	3.2 Describe the factors which affect the choice of personal protective clothing for different procedures.		
	3.3 Explain the importance of wearing personal protective clothing for the scrubbed clinical role.		
	3.4 Explain why it is necessary to change personal protective equipment which has become unsuitable.		
4. Be able to work within scrubbed clinical roles.	4.1 Apply standard precautions for infection control.		
	4.2 Implement health and safety measures relevant to scrubbed clinical roles.		
	4.3 Select and wear personal protective equipment in line with local policies and protocols.		
	4.4 Identify and maintain the sterile field by following theatre etiquette and protocols.		
	4.5 Dispose of used personal protective equipment appropriately.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	4.6 Report any potential contamination in line with local policies and protocols.		

Additional information about the unit:	
Relationship to National Occupational Standards (NOS)	PCS13.
Additional unit assessment requirements	This unit must be assessed in line with Skills for Health's Assessment Principles. Learning outcome 4 must be assessed in a real work environment.
Unit guidance	The sterile field is a specified area that is considered free of viable microorganisms. This is often an area immediately around an individual that has been prepared for a surgical procedure. The sterile field includes the scrubbed team members, and all furniture and fixtures in the area. Standard precautions are the precautions considered sufficient to reduce the risk of harm or injury by transmission of pathogens.

THEA 11: Prepare and provide surgical instrumentation and supplementary items for the surgical team

Unit reference	A/615/7250	Unit level	3
Credit value	6	GL	43
Unit aim	This unit is aimed at those who are responsible for preparing surgical instrumentation and supplementary items and making them available to the surgical team in a perioperative environment.		

Learner name:		Centre no:	
PIN:		ULN:	

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
1. Understand how to prepare and provide surgical instrumentation and items for the surgical team in line with health and safety procedures and protocols.	1.1 Explain how the sterile field contributes to infection control in the operative setting.		
	1.2 Explain how to maintain the sterile field during surgical procedures and the actions to take if it is compromised.		
	1.3 Explain the types, purposes and functions of commonly used surgical instruments and the potential hazards associated with their use.		
	1.4 Describe common supplementary items and their use during surgery.		
	1.5 Explain the procedures for identifying and reporting problems with instruments and items during preparation and throughout the procedure.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	1.6 Explain the principles and techniques for counting instruments, sharps, swabs and supplementary items and the importance of these.		
2. Be able to prepare surgical instruments and supplementary items for the surgical team.	2.1 Apply standard precautions for infection control.		
	2.2 Maintain compliance with health and safety guidance at all times.		
	2.3 Check surgical instruments and supplementary items before preparation and confirm as being within expiry date, safe and fit for purpose.		
	2.4 Select and prepare required surgical instruments and supplementary items for the procedure.		
	2.5 Set up surgical instruments and supplementary items to meet the needs of the operative procedure and the individual's plan of care.		
	2.6 Count and record instruments, sharps, swabs and supplementary items prior to commencing the procedure in line with local policies and protocols.		
3. Be able to provide surgical instruments and supplementary items for the surgical team.	3.1 Handle instruments and supplementary items in line with local policies and protocols while maintaining the integrity of the sterile field.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	3.2 Anticipate the needs of the surgical team by monitoring their activities and the placement of items within the surgical field.		
	3.3 Clarify any uncertainty over the requirements of the surgical team with the appropriate person .		
	3.4 Provide instrumentation and supplementary items to meet the needs of the surgical team and the individual's plan of care.		
	3.5 Count and record instruments, sharps, swabs and supplementary items during the process and prior to close and completion in line with national and local policies and protocols.		
	3.6 Inform the surgical team of instrument and supplementary item counts during the procedure in line with local policies and protocols.		
4. Be able to dispose of waste from the sterile field	4.1 Dispose of and transfer used instruments and supplementary items to the non-sterile area for accounting, tracking and traceability in line with local policies and protocols.		
	4.2 Update records in line with national guidelines.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	4.3 Remove and dispose of drapes in line with local policies and protocols.		
	4.4 Maintain the dignity of the individual throughout the procedure in line with local policy and protocol.		

Additional information about the unit:	
Relationship to National Occupational Standards (NOS)	PCS14 & 16.
Additional unit assessment requirements	This unit must be assessed in line with Skills for Health's Assessment Principles. Learning outcomes 2, 3 and 4 must be assessed in a real work environment.

THEA 12: Prepare equipment for intraoperative cell salvage blood processing

Unit reference	L/615/7267	Unit level	2
Credit value	4	GL	26
Unit aim	This unit aims to develop the learner's ability to set up equipment to process salvaged blood. Understanding of the functions and recommended uses of processing equipment is required. The learner works closely with the appropriate member of the team.		

Learner name:		Centre no:	
PIN:		ULN:	

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
1. Understand current legislation, national guidelines, policies, protocols and good practice which inform own practice in the preparation of equipment for intraoperative cell salvage blood processing.	1.1 Summarise the current legislation, national guidelines, policies, protocols and good practice guidelines which inform own practice in the preparation of equipment for intraoperative cell salvage blood processing.		
2. Understand blood transfusion issues in relation to intraoperative cell salvage.	2.1 Explain the rationale for using autologous blood transfusion.		
	2.2 Explain the applications of intraoperative cell salvage with regard to those who refuse allogeneic blood on religious or other grounds.		
3. Understand the rationale for the use of intraoperative cell salvage.	3.1 Outline the indications and contra-indications for the use of intraoperative cell salvage.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
4. Understand how the decision to proceed with intraoperative cell salvage blood processing is made.	4.1 Outline how to estimate blood loss during intraoperative cell salvage.		
	4.2 Outline the reasons for an expiry time for intraoperative cell salvaged blood and define how this is calculated.		
	4.3 Outline the possible contents of the collection reservoir during surgery relevant to the decision to set up to process intraoperative cell salvaged blood.		
5. Understand the rationale for swab washing in relation to intraoperative cell salvage blood.	5.1 Outline the benefits and risks of swab washing.		
6. Understand the role and function of equipment used for intraoperative cell salvage blood processing.	6.1 Outline the types and functions of intraoperative cell salvage machines used in own work practice to salvage blood.		
	6.2 Explain the rationale for expiry time on the set-up equipment.		
	6.3 Outline the factors which inform the decision to set up processing equipment.		
	6.4 Explain the rationale for selecting the machine programme.		
	6.5 Explain the dangers of re-using single-use equipment.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	6.6 Describe the potential hazards and malfunctions of equipment and how to deal with them.		
7. Be able to prepare equipment for intraoperative cell salvage blood processing.	7.1 Apply standard precautions for infection control.		
	7.2 Implement health and safety measures relevant to preparing equipment for intraoperative cell salvage blood processing.		
	7.3 Confirm with the appropriate person the suitability of the intraoperative cell salvage blood for processing.		
	7.4 Confirm that the processing equipment is fit for purpose.		
	7.5 Load the processing equipment and connect to the collection equipment in accordance with manufacturer's guidelines.		
	7.6 Confirm the wash fluid is intravenous normal saline 0.9%.		
	7.7 Prime the system and set the machine programme ready for use in accordance with guidance.		
	7.8 Inform the appropriate person that the processing equipment is ready for use.		

Additional information about the unit:	
Relationship to National Occupational Standards (NOS)	PCS21.
Additional unit assessment requirements	This unit must be assessed in line with Skills for Health's Assessment Principles. Learning outcome 7 must be assessed in a real work environment.
Unit guidance	Standard precautions are the precautions considered sufficient to reduce the risk of harm or injury by transmission of pathogens. An appropriate person is the person accountable for the outcome of the procedure. This may be a responsible clinician (surgeon/anaesthetist), a cell salvage operator (e.g. nurse, operating department practitioner (ODP), midwife, perfusionist) or a scrub nurse if they are waiting for the cell saver to set up to hand out the line.

THEA 13: Prepare and apply dressings and drains to individuals in the perioperative environment

Unit reference	Y/615/7286	Unit level	2
Credit value	2	GL	18
Unit aim	This unit is aimed at those in a scrubbed role who assist with the preparation and application of dressings, wound supports and drains.		

Learner name:		Centre no:	
PIN:		ULN:	

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
1. Understand the health and safety measures related to preventing wound contamination and cross-infection when preparing and applying dressings and drains.	1.1 Explain the principles of asepsis, antisepsis and cross-infection.		
	1.2 Identify potential sources of contamination when preparing surgical fields and how to prevent this.		
	1.3 Identify the types of pathogens commonly causing wound infection and the consequences of wound contamination.		
	1.4 Explain the principles of wound healing and wound care.		
	1.5 Identify the correct dressings and drains to suit the type and size of wound.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
2. Understand how medical devices are used in the application of dressings, wound supports and drains in the learner environment.	2.1 Explain the purpose and function of medical devices used in the application of dressings and drains.		
	2.2 Describe potential hazards associated with the use of medical devices to apply dressings and drains.		
	2.3 Explain the factors which inform the choice of medical devices for the application of dressings and drains to individuals.		
	2.4 Explain the factors which inform the choice of sites for attaching medical devices.		
3. Be able to select and prepare dressings and drains according to individual requirements.	3.1 Confirm the individual's identity and gain valid consent .		
	3.2 Give the individual information and reassure them when preparing to administer a dressing or drain.		
	3.3 Apply standard precautions for infection control.		
	3.4 Implement health and safety measures relevant to preparing dressings and drains.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	3.5 Identify, through discussion with the individual, any allergies they may have which will affect the types of dressing used.		
	3.6 Select and prepare dressings to suit the size and type of wound and promote healing.		
	3.7 Prepare drains according to local policies and protocols.		
4. Be able to apply dressings and attach drains according to individual requirements.	4.1 Apply the dressing or attach drain to the individual in accordance with local policies and protocols.		
	4.2 Check that the dressing has been applied correctly, in particular that: <ul style="list-style-type: none"> • the pressure is consistent with the type of wound • drains are secure • vacuum seals on the drains are intact • the position of the drain prevents syphonage and/or harm to the individual. 		
	4.3 Report any issues outside your own sphere of competence in line with local policy and protocol.		
	4.4 Update records in line with local policy and protocol.		

Additional information about the unit:	
Relationship to National Occupational Standards (NOS)	PCS18.
Additional unit assessment requirements	This unit must be assessed in line with Skills for Health's Assessment Principles. Learning outcomes 3 and 4 must be assessed in a real work environment.

5. Understand the process and rationale of swab washing for intraoperative cell salvage blood collection.	5.1 Outline the benefits and risks of swab washing.		
	5.2 Explain the rationale for weighing all swabs during intraoperative cell salvage blood collection.		
	5.3 Describe the process of salvaging blood from swabs.		
6. Be able to prepare to operate equipment for intraoperative cell salvage blood collection.	6.1 Apply standard precautions for infection control.		
	6.2 Implement health and safety measures in accordance with national and local policies and protocols.		
	6.3 Confirm the decision to collect blood with the appropriate person.		
	6.4 Label the collection reservoir with the individual's unique identification details in line with local policy and protocols.		
	6.5 Prime the collection equipment with anticoagulant solution according to the manufacturer's instructions.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
7. Be able to collect intraoperative cell salvage blood.	7.1 Use equipment to collect intraoperative cell salvage blood.		
	7.2 Monitor the volume of cell salvage blood, immediately reporting any problems to an appropriate person.		
	7.3 Regulate the required volume of anticoagulant in relation to blood loss.		
	7.4 Explain the importance of reporting problems/sudden increases in the rate of blood loss to the appropriate person .		
	7.5 Explain how to estimate blood loss during intraoperative cell salvage blood collection.		
	7.6 Report the estimated volume of cell salvage blood collected to the appropriate person.		
	7.7 Outline the possible contents of the collection reservoir during surgery.		
	7.8 Outline the reasons for an expiry time for cell salvaged blood and how this is calculated.		
	7.9 Record the outcome of this activity in line with national/local policies and protocols.

	5.4 Describe the potential hazards and malfunctions of equipment and how to deal with them.		
	5.5 Outline the dangers of re-using single-use equipment.		
	5.6 Explain the limits of their own role in operating and monitoring equipment for processing salvaged blood.		
6. Understand the reinfusion process.	6.1 Describe how reinfusion bags should be labelled.		
	6.2 Outline the potential contents of the reinfusion bag.		
	6.3 Outline the types of filters used to reinfuse intraoperative cell salvage blood and their limitations.		
7. Be able to prepare to operate equipment for intraoperative cell salvage blood processing.	7.1 Implement health and safety measures relevant to preparing to operate equipment for intraoperative cell salvage blood processing.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	7.2 Apply standard precautions for infection control.		
	7.3 Outline the factors which inform the decision to process the reservoir contents.		
	7.4 Confirm the decision to process intraoperative cell salvage blood with the appropriate person .		
	7.5 Use normal intravenous saline 0.9% wash fluid and explain the factors which inform the choice of wash fluid.		
	7.6 Explain the importance of using the required wash volume.		
8. Be able to operate equipment for processing intraoperative cell salvage blood and complete intraoperative cell salvage blood process.	8.1 Monitor the progress of intraoperative cell salvage blood processing, reporting any problems to the appropriate person in line with local policy and protocol.		
	8.2 Record the volume of processed intraoperative cell salvage blood for reinfusion.		
	8.3 Report completion of the process to the appropriate person.		
	8.4 Outline how to estimate blood loss during intraoperative cell salvage.		

Learning outcomes The learner will:	Assessment criteria The learner can:	Evidence record e.g. page number & method	Assessor judgement achieved Initial and date
	8.5 Outline the reasons for an expiry time for intraoperative cell salvaged blood and define how this is calculated.		
	8.6 Label salvaged blood reinfusion bags in line with national/local policy.		
	8.7 Keep the intraoperative cell salvaged blood reinfusion bags with the individual at all times.		
	8.8 Dispose of waste in line with national/local policy and protocol.		
	8.9 Explain the principles of waste disposal in relation to equipment.		
	8.10 Explain the importance of documenting the amount of anticoagulant used.		
	8.11 Complete required documentation in line with national/local policy and protocol.

Recommended assessment methods

A recommended range of assessment methods has been identified, which may be used for the units in this qualification. This gives the opportunity for different learning styles and individual needs of learners to be taken into account.

If you are proposing to use an assessment method that is not included within the recommended list you should contact your External Quality Advisor with full details of your proposed method. It will need formal approval from us before it can be used.

Please refer to the notes relating to **Expert Witness testimony** and **simulation** which follow this table.

Please note mandatory assessment for 'DHS 15 Study Skills for Senior Healthcare Support Workers' unit must provide evidence of a piece of extended writing or a project.

Ref	Assessment Method	Assessing Competence / Skills	Assessing Knowledge / Understanding
A	Direct observation of learner by Assessor <ul style="list-style-type: none"> by an Assessor who meets the relevant Sector Skills Council's or other assessment strategy/principles and includes inference of knowledge from this direct observation of practice 	Yes	Yes
B	Professional discussion	Yes	Yes
C	Expert Witness evidence* <ul style="list-style-type: none"> when directed by the Sector Skills Council or other assessment strategy/principles 	Yes	Yes
D	Learner's own work products	Yes	Yes
E	Learner log or reflective diary	Yes	Yes
F	Activity plan or planned activity	Yes	Yes
G	Observation of children, young people or adults by the learner	Yes	Yes

Ref	Assessment Method	Assessing Competence / Skills	Assessing Knowledge / Understanding

I	Recognition of prior learning	Yes	Yes
J	Reflection on own practice in real work environment	Yes	Yes
K	Written and pictorial information	No	Yes
L	Scenario or case study	No	Yes
M	Oral questions and answers	Yes	Yes

* **Expert Witness testimony** should be used in line with the relevant assessment strategy/principles. This method must be used with professional discretion, and only selected when observation would not be appropriate. Those providing an expert witness testimony must be lead practitioners with experience of making judgements around competence. The circumstances that may allow for an expert witness testimony include:

- when assessment may cause distress to an individual, such as supporting a child with a specific need
- a rarely occurring situation, such as dealing with an accident or illness
- confidential situations – such as safeguarding strategy meetings – where it would be inappropriate for an Assessor to observe the learner's performance.

** **Simulation.** A learner's Portfolio of Evidence may only include simulation of skills where simulation is permitted by the relevant assessment strategy/principles.

Skills for Health Assessment Principles
