Section 1: introduction

Please note this is a draft version of the Qualification Specification and is likely to be subject to change before the final version is produced for the launch of the qualification.

Centres must ensure they are using the most recent version of the Qualification Specification on the NCFE website.

Aims and objectives

This qualification aims to:

- enable entry to the associated occupation, providing entry competence, however further learning may be required in the workplace to reach full occupational competence
- focus on the study of supporting teaching and learning
- offer breadth and depth of study, incorporating a key core knowledge
- provide opportunities to acquire a number of practical and technical skills

The objectives of this qualification are to:

- provide learners with an in-depth understanding of the knowledge and skills needed to work in a school or college environment
- provide a stepping stone into further learning within the sector

Support Handbook

This Qualification Specification must be used alongside the mandatory Support Handbook, which can be found on the NCFE website. This contains additional supporting information to help with planning, delivery and assessment.

This Qualification Specification contains all the qualification-specific information you will need that is not covered in the Support Handbook.

Guidance for entry and registration

This qualification is designed for learners working in roles that offer specialist support for pupils' learning in primary, secondary or special schools, as well as colleges.

Registration is at the discretion of the centre in accordance with equality legislation and should be made on the NCFE Portal. Learners must be aged 19 or above to undertake this qualification.

There is no specific prior knowledge a learner must have for this qualification. However, learners may find it helpful if they have already achieved a level 2 qualification.

Centres are responsible for ensuring that all learners are capable of achieving the units and learning outcomes (LOs) and complying with the relevant literacy, numeracy, and health and safety requirements.

Learners registered on this qualification should not undertake another qualification at the same level, or with the same/a similar title, as duplication of learning may affect funding eligibility.

Achieving this qualification

To be awarded this qualification, learners are required to successfully achieve **all 16 mandatory** units.

Please refer to the list of units in appendix A or the unit summaries in section 2 for further information.

To achieve this qualification, learners must successfully demonstrate their achievement of all LOs of the units as detailed in this Qualification Specification. A partial certificate may be requested for learners who do not achieve the full qualification but have achieved at least one whole unit; partial achievement certificate fees can be found in the Fees and Pricing document on the NCFE website.

Age range covered by the qualification

This qualification relates to working with children and/or young people from five years of age. Please note that some knowledge of development in the early years has been included in the specification to enhance learners' understanding.

Progression

Learners who achieve this qualification could progress to the following:

- employment:
 - teaching assistant
 - assistant teacher
 - classroom assistant
 - learning support assistant
 - specialist curriculum support
- further education:
 - special educational needs
 - early years education
 - teaching and learning
- higher education

Progression to higher-level studies

Level 3 qualifications can support progression to higher-level study, which requires knowledge and skills different from those gained at levels 1 and 2. Level 3 qualifications enable learners to:

- apply factual, procedural and theoretical subject knowledge
- use relevant knowledge and methods to address complex, non-routine problems
- interpret and evaluate relevant information and ideas
- understand the nature of the area of study or work
- demonstrate an awareness of different perspectives and approaches
- identify, select and use appropriate cognitive and practical skills
- use appropriate research to inform actions
- review and evaluate the effectiveness of their own methods

Resource requirements

There are no mandatory resource requirements for this qualification, but centres must ensure learners have access to suitable resources to enable them to cover all the appropriate LOs.

Realistic work environment (RWE) requirement

The assessment of competence-based criteria should ideally be conducted within the workplace. However, in instances where this is not feasible, learners can be assessed in a realistic work environment (RWE) designed to replicate real work settings.

It is essential for organisations utilising an RWE to ensure it accurately reflects current and authentic work environments. By doing so, employers can be confident that competence demonstrated by a learner in an RWE will be translated into successful performance in employment.

In establishing an RWE, the following factors should be considered.

The work situation being represented is relevant to the competence requirements being assessed:

- the work situation should closely resemble the relevant setting
- equipment and resources that replicate the work situation must be current and available for use to ensure that assessment requirements can be met
- time constraints, resource access and information availability should mirror real conditions

The learner's work activities reflect those found in the work environment being represented, for example:

- interaction with colleagues and others should reflect expected communication approaches
- tasks performed must be completed to an acceptable timescale
- learners must be able to achieve a realistic volume of work as would be expected in the work situation being represented
- learners operate professionally with clear understanding of their work activities and responsibilities
- feedback from colleagues and others (for example customers, service users) is maintained and acted upon
- account must be taken of any legislation, regulations or standard procedures that would be followed in the workplace

Work/industry placement experience

As learners need to show competence in both skills and knowledge, they will need to be employed, or be on a practical placement for the duration of the taught programme of study in a learning environment, such as a school or college.

It is recommended that the learner undertakes 200 hours of placement in a RWE, to be completed throughout the duration of the qualification before certification.

The hours above are recommendations, not mandatory minimum placement hours. They are therefore not part of the TQT calculation.

How the qualification is assessed

Assessment is the process of measuring a learner's skill, knowledge and understanding against the standards set in a qualification.

This qualification is internally assessed and externally quality assured.

The assessment consists of one component:

- an internally assessed portfolio of evidence, which is assessed by centre staff and externally quality assured by NCFE (internal quality assurance must still be completed by the centre as usual)

The minimum portfolio requirements are:

- six written works (for example, case studies, reports and essays)
- two slide shows
- three pupil observations
- one reflective account

Learners must be successful in this component to gain the NCFE CACHE Level 3 Teaching Occupational Entry in Supporting Teaching and Learning (Diploma) (610/4000/9).

Learners who are not successful can resubmit work within the registration period; however, a charge may apply in cases where additional external quality assurance visits are required.

Unless otherwise stated in this specification, all learners taking this qualification must be assessed in English and all assessment evidence presented for external quality assurance must be in English.

Internal assessment

We have created some sample tasks for the 16 internally assessed units, which can be found within a separate document in the member's area of the NCFE website. These tasks are not mandatory. You can contextualise these tasks to suit the needs of your learners to help them build up their portfolio of evidence. The tasks have been designed to cover LOs for 16 units and provide opportunities for stretch and challenge. For further information about contextualising the task/tasks, please contact the Provider Development team.

Unit 11 has a **mandated** assessment approach that requires learners to complete a reflective log.

Each learner must create a portfolio of evidence generated from appropriate assessment tasks to demonstrate achievement of all the LOs associated with each unit. On completion of each unit, learners must declare that the work produced is their own and the assessor must countersign this.

If a centre needs to create their own internal assessment tasks, there are four essential elements in the production of successful centre-based assessment tasks; these are:

- ensuring the assessment tasks are meaningful with clear, assessable outcomes
- appropriate coverage of the content, LOs or assessment criteria (AC)
- having a valid and engaging context or scenario
- including sufficient opportunities for stretch and challenge for higher attainers

Section 2: unit content and assessment guidance

This section provides details of the structure and content of this qualification.

The types of evidence listed are for guidance purposes only. Within learners' portfolios, other types of evidence are acceptable if all learning outcomes (LOs) are covered, and if the evidence generated can be internally and externally quality assured. For approval of methods of internal assessment other than portfolio building, please contact your external quality assurer (EQA).

The explanation of terms explains how the terms used in the unit content are applied to this qualification. This can be found in section 3.

NCFE assessment strategy

The key requirements of the assessment strategies or principles that relate to units in this qualification/these qualifications are summarised below.

The centre must ensure that individuals undertaking assessor or quality assurer roles within the centre conform to the assessment requirements for the unit they are assessing or quality assuring.

Knowledge LOs

- assessors will need to be both occupationally knowledgeable and qualified to make assessment decisions
- internal quality assurers (IQAs) will need to be both occupationally knowledgeable and qualified to make quality assurance decisions

Competence/skills LOs

- assessors will need to be both occupationally competent and qualified to make assessment decisions
- IQAs will need to be both occupationally knowledgeable and qualified to make quality assurance decisions

The centre with whom the learners are registered will be responsible for making all assessment decisions. Assessors must be **contracted** to work directly with the centre, contributing to all aspects of standardisation. The centre must ensure a process of training is followed, including during induction and quality assurance activities. Occupationally competent and qualified assessors from the centre must use direct observation to assess practical skills-based outcomes.

Section 3: explanation of terms

This table explains how the terms used at level 3 in the unit content are applied to this qualification (not all verbs are used in this qualification).

| | |
|---------------------------------------|---|
| Analyse | Break the subject down into separate parts and examine each part. Show how the main ideas are related and why they are important. Reference to current research or theory may support the analysis. |
| Apply | Explain how existing knowledge can be linked to new or different situations in practice. |
| Clarify | Explain the information in a clear, concise way. |
| Classify | Organise according to specific criteria. |
| Collate | Collect and present information arranged in sequence or logical order. |
| Compare | Examine the subjects in detail and consider the similarities and differences. |
| Consider | Think carefully and write about a problem, action or decision. |
| Critically compare | This is a development of compare where the learner considers the positive aspects and limitations of the subject. |
| Demonstrate | Show an understanding by describing, explaining or illustrating using examples. |
| Describe | Write about the subject giving detailed information in a logical way. |
| Develop (a plan/idea which...) | Expand a plan or idea by adding more detail and/or depth of information. |
| Diagnose | Identify the cause based on valid evidence. |
| Differentiate | Identify the differences between two or more things. |
