Dear Vicky

**NCFE Level 1/2 Technical Award in Engineering (603/2963/4)**

I confirm that we recognise and support the above qualification.

SOE is one of the thirty five Professional Engineering Institutions licensed by Engineering Council and have licences to award Chartered Engineer, Incorporated Engineer and Engineering Technician. We also hold licences to accredit academic and professional development courses/programmes up to and including Incorporated Engineer. We have over 17,000 members across a number of engineering specialisms and provide continual professional development opportunities across the world.

The understanding and skills gained through this qualification could be useful for learners to progress onto an Apprenticeship in the Engineering sector through a variety of occupations which are available within sectors such as an Aerospace software development engineer, Aircraft maintenance certifying engineer, Automotive Engine Test Engineer and Food and Drink Engineer. This qualification could also prepare learners for recruitment into the armed forces in the Army, Royal Air Force or the Royal Navy.

This qualification is suitable for anyone aged 14-16.

Yours sincerely

Daniel Moir  
Head of Operations  
Society of Operations Engineers
