Skills Portfolio

Bespoke e-portfolio

Designed for anyone undertaking training, **Skills Portfolio** is an e-portfolio system that manages the complete end-to-end learner journey and allows you to assess remotely, monitor learner progress, create immediate dashboard reports, and manage your quality assurance. It is fully compliant with Ofsted and ESFA audit requirements, giving you the evidence needed during inspection.

Skills Portfolio is a secure, cloud-based e-portfolio suitable for apprenticeships, vocational qualifications, or for anyone who is delivering or undertaking training.

The system is fully customisable and compatible with your own MIS/CRM systems, and can be adapted to suit any qualification or training from our large bank of pre-loaded Individual Learning Plans (ILPs), or you can use your own ILPs.

The software will guide learners through their qualification framework and they can upload a range of evidence, including photos and videos. The system also includes a 20% 'off the job' training calculator and activity log.

Skills Portfolio supports you to monitor and verify progress remotely, give feedback, create reports, download evidence for inspections and support you to continuously assess end-point assessment gateway readiness.

"Of all of the systems I tried, I found Skills Portfolio to be the easiest, most effective solution which offered multiple benefits for both learner use and external verification visits. We've been able to reduce our admin time, which means we can spend more time supporting learners."
