Introduction

The internal non-exam assessment is a formal internal synoptic assessment that requires the learner to independently apply an appropriate selection of knowledge, understanding, skills and techniques, developed through the full course of study, in response to a real-world situation, to enable them to demonstrate an integrated connection and coherence between the different elements of the qualification.

The non-exam assessment will contribute **60%** towards the overall qualification grade and therefore it is important that the learner produces work to the highest standard that they can. The learner, therefore, should not be entered for the NEA until they have been taught the full course of study, to ensure that they are in the best position to complete the NEA successfully.

What is synoptic assessment?

Synoptic assessment is an important part of a high-quality vocational qualification because it shows that learners have achieved a holistic understanding of the sector and that they can make effective connections between different aspects of the subject content and across the breadth of the assessment objectives in an integrated way. The Department for Education (DfE) has consulted with Awarding Organisations and agreed the following definition for synoptic assessment:

“A form of assessment which requires a candidate to demonstrate that s/he can identify and use effectively in an integrated way an appropriate selection of skills, techniques, concepts, theories, and knowledge from across the whole vocational area, which are relevant to a key task.”

Synoptic assessment enables learners to show that they can transfer knowledge and skills learnt in one context to resolve problems raised in another. To support the development of a synoptic approach, the qualification encourages learners to make links between elements of the course and to demonstrate how they have integrated and applied their increasing knowledge and skills.

As learners progress through the course, they will use and build upon knowledge and skills learnt across units. The NEA will test the learners' ability to respond to a real-world situation.

Information for learners

Introduction

The internal non-exam assessment is a formal assessment that will contribute **60%** towards your overall qualification grade. It takes the form of a synoptic project that will require you to draw on your knowledge and understanding of the entire qualification, it is therefore important that you produce work to the highest standard that you can.

You will be assessed on your ability to independently select, apply and bring together the appropriate knowledge, understanding, skills and techniques you have learnt throughout your course of study, in response to a brief, set in a real-world situation.

The non-exam assessment will be assessed holistically using a levels of response mark grid and against 5 integrated assessment objectives. These assessment objectives and their weightings are shown below.

Assessment objective (AO)
AO1 – Recall knowledge and show understanding The emphasis here is for learners to recall and communicate the fundamental elements of knowledge and understanding. 18 marks (15%)
AO2 – Apply knowledge and understanding The emphasis here is for learners to apply their knowledge and understanding to real-world contexts and novel situations. 30 marks (25%)
AO3 – Analyse and evaluate knowledge and understanding The emphasis here is for learners to develop analytical thinking skills to make reasoned judgements and reach conclusions. 20 marks (16.66%)
AO4 – Demonstrate and apply relevant technical skills, techniques, and processes The emphasis here is for learners to demonstrate the essential technical skills relevant to the vocational sector, by applying the appropriate processes, tools, and techniques. 40 marks (33.34%)
AO5 – Analyse and evaluate the demonstration of relevant skills and techniques The emphasis here is for learners to analyse and evaluate the essential technical skills, processes, tools, and techniques relevant to the vocational sector. 12 marks (10%)

Preparation and research time

Maximum time: 2 hours

In addition to the allocated assessment time for this non-exam assessment (NEA), you are permitted to spend a maximum of **2** hours to undertake research and develop a pack of resources that you can refer to during the formal NEA assessment time. During this 2-hour period, you may access all learning materials, internet access and other published materials.

You should use this time to create your own resource pack and it is this pack alone that you may use during the allocated time given to the NEA. This is the only support material that is permitted during the completion of NEA tasks (unless otherwise stated within each task instructions).

All research or data used in your final NEA **must** be referenced appropriately. As a minimum this should include the following:

- the use of quotation marks to clearly identify any passages not of your own words
- date accessed
- name of source / author

Evidence requirements: research pack of no more than four sides of A4, font size 12 (if word processed) to be returned to your tutor at the end of each session and submitted with the completed NEA.

Maximum completion time

You have been provided with a total of **21** hours to complete this non-examined assessment (plus 2 hours for preparation and research).

You may use some or all of the time provided for each task.

You are allowed to use any remaining time allocated to one task to rework previous tasks up to the maximum time allowed.

You are not allowed to exceed the total number of hours.

You should not start your NEA until you have been taught the full course of study. This will ensure that you are in the best position to complete the NEA successfully.

Project brief

You are the owner of IsaFlo Ltd. IsaFlo makes a range of office furniture such as desks and chairs. The brand is known for its high quality and excellent design.

Customer service is rated at 98% positive and less than 0.1% of furniture is returned due to poor quality.

IsaFlo operates in a very competitive environment and sales of its furniture have failed to increase over the last 3 years.

You want IsaFlo to expand into the outdoor furniture market to generate sales.

The outdoor furniture will be sold direct to the public and customers will only be able to order the furniture through IsaFlo's website.

Batch production will be used to make the furniture. To keep stockholding costs down the business uses a just-in-time method of stock control. Manufacturing of the furniture will take place in IsaFlo's factory based in the Midlands.

Finance will be required to fund development and production of the outdoor furniture.

You need to consider sources of finance.

Using all relevant materials, you are required to create a project plan, complete research and create a business plan that could be presented to an organisation to raise finance.

You should use the following appendices to help you.

It is not a requirement that the learner formulates a response in their portfolio specifically against each assessment objective (AO) as laid out in the indicative content (IC). The evidence provided by the learner for each AO may be embedded throughout the evidence submitted for the task. Whilst it is likely that the responses will be illustrated by the IC points below, credit should be given for different approaches, providing they meet the key requirements of the task and mark scheme.

Indicative content:

AO1 – Learners will recall knowledge and show understanding of what it means to be an entrepreneur in terms of:

- identifies potential business opportunity
- evaluates viability of business opportunity
- understands target market
- organises resources / the factors of production
- raises the finance
- makes decisions on the marketing mix
- manages risks.

- IsaFlo operate in the manufacturing sector and have high-quality products
- the business operates in a competitive market
- the business wants to expand into the outdoor furniture market
- to ensure that the business can undertake this expansion the business will need to assess the size of the potential market, who the customers could be, what manufacturing techniques would be used, where this manufacturing will take place, what prices will be charged, how this expansion could be financed
- it is important that the project is well planned and therefore the business will need to create a time plan that will cover all stages required for IsaFlo to expand into this new market.

AO3 – Learners will analyse and evaluate knowledge and understanding of the following:

- information on the potential expansion plan. This may include, but is not limited to, an analysis of market information relevant to IsaFlo. an analysis of strengths and weaknesses of the competition IsaFlo face, an analysis of operational issues, an analysis of human resources the business can draw on, and an analysis of the financial data
- reasons why this expansion could be successful. This may include, but is not limited to, evaluation of the market, the level of competition, operations, human resources and finance
- an evaluation of the timeline you chose. This may include, but is not limited to, allocation of time per task and the order you chose to complete the tasks.

AO3 – Learners will analyse and evaluate knowledge and understanding via the interpretation of the requirements of the brief. It is not a requirement that the learner formulates a response in their portfolio specifically against each assessment objective (AO) as laid out in the indicative content (IC). The evidence provided by the learner for each AO may be embedded throughout the evidence submitted for the task. Whilst it is likely that the responses will be illustrated by the IC points below, credit should be given for different approaches, providing they meet the key requirements of the task and mark scheme.

This is implied through the demonstration required of AO4, and the application required of AO2 for the production of a business plan. That may include the following:

Interpretation of the brief:

- business is growing from just producing office furniture to also producing outdoor furniture
- sales only made through their website
- batch production is to be used (no other production method awardable)
- just in time method of stock control (no other method awardable)
- finance is required to enable the plan to take place – sources must be considered.

It is not a requirement that the learner formulates a response in their portfolio specifically against each assessment objective (AO) as laid out in the indicative content (IC). The evidence provided by the learner for each AO may be embedded throughout the evidence submitted for the task. Whilst it is likely that the responses will be illustrated by the IC points below, credit should be given for different approaches, providing they meet the key requirements of the task and mark scheme.

Indicative content

AO2 – Learners will apply knowledge and understanding of business planning to the requirements of the brief that may include the following:

- the business planning requirements of IsaFlo to enable the expansion plans to successfully take place. This will include consideration of how the business will move from only producing office furniture to expanding to the outdoor furniture market
- information as to the production factors that the business will have to consider to enable the plans to take place. This will focus on batch production (as per the brief) and just in time method of stock control (as per the brief)
- the funding required to facilitate the plans will be considered and relevant sources of finance discussed that are appropriate to the business and the project plans.

AO4 – Learners will demonstrate the application of vocational skills with the creation and completion of a business plan that may include the following:

- executive summary:
 - company name
 - product provided
 - reasons(s) for product
 - target market
 - legal structure
 - finance required
- primary and secondary research:
 - competition:
 - products and prices
 - number and location
 - distribution methods

Indicative content

AO5 – Learner will analyse and evaluate the whole process of developing the business plan including:

Evaluation of how well the project planning, research and development of the business plan to include the following:

- Was the business summary accurate?
- Was the timeline realistic and was it adhered to?
- Was the research conducted effective and did it provide the information / data that was needed for the business plan?
- How could the research conducted be improved?
- Were all sections of the business plan completed in sufficient detail?
- Which sections of the business plan were difficult to complete?
- How could the business plan be improved?
- If you were to undertake the whole project again, what would you do the same and what would you change?

This is the end of the non-exam assessment.

Mark scheme

The purpose of this mark scheme is to give you:

- examples and criteria of the types of response expected from a learner
- information on how individual marks are to be awarded
- the allocated assessment objective(s) and total marks for each question.

Marking guidelines

General guidelines

You must apply the following marking guidelines to all marking undertaken. This is to ensure fairness to all learners, who must receive the same treatment. You must mark the first learner in exactly the same way as you mark the last.

- The mark scheme must be referred to throughout the marking period and applied consistently, do not change your approach to marking once you have been standardised.
- Reward learners positively, giving credit for what they have shown, rather than what they might have omitted.
- Utilise the whole mark range and always award full marks when the response merits them.
- Be prepared to award zero marks if the learner's response has no creditworthy material.
- Do not credit irrelevant material that does not answer the question, no matter how impressive the response might be.
- If you are in any doubt about the application of the mark scheme, you must consult with your centre's internal quality assurer.

Guidelines for using extended response marking grids

Extended response mark grids have been designed to assess learners' work holistically. They consist of levels-based descriptors and indicative content.

Levels-based descriptors

Each level is made up of several descriptors for across the AO range – AO1 to AO5, which when combined provide the quality of response that a learner needs to demonstrate. Each level-based descriptor is worth varying marks.

The grids are broken down into levels, with each level having an associated descriptor indicating the performance at that level. You should determine the level before determining the mark.

Indicative content reflects content-related points that a learner may make but is not an exhaustive list, nor is it a model answer. Learners may make all, some or none of the points included in the indicative content, as its purpose is as a guide for the relevance and expectation of the responses. Learners must be credited for any other appropriate response.

Application of extended response marking grids

When determining a level, you should use a bottom-up approach. If the response meets all the descriptors in the lowest level, you should move to the next one, and so on, until the response matches the level descriptor. Remember to look at the overall quality of the response and reward learners positively, rather than focussing on small omissions. If the response covers aspects at different levels, you should use a best-fit approach at this stage and use the available marks within the level to credit the response appropriately.

When determining a mark, your decision should be based on the quality of the response in relation to the descriptors.
